Subject: Global Invitation CanSat 2024, Submission Deadline Approaching

Dear Dean or Coordinator of Academic Programs,

We are delighted to extend an invitation to the students of your university to participate in our World Cup CanSat course-competition, which is nearing its submission deadline on December 15, 2023.

The CanSat World Competition is a challenging educational event designed to foster a culture of space sciences among university students globally. In this course-competition, students develop skills to simulate a space mission through the construction and launch of a canned satellite, gaining hands-on experience in the field of space technology.

Participants will learn to build a canned satellite through a complimentary course, and their acquired knowledge will be put to the test during the final launch. This competition is open to students from any university course.

We hope to receive your support in disseminating this information within your community, providing students with the opportunity to embark on this thrilling space adventure!

For further details about CanSat World 2023-2024 and information on student participation, we invite you to visit our official website <http://peu.unam.mx>
