Intellectual Property Rights

IPRs essential or potentially essential to the present document may have been declared to ETSI. The information pertaining to these essential IPRs, if any, is publicly available for **ETSI members and non-members**, and can be found in ETSI SR 000 314: *"Intellectual Property Rights (IPRs); Essential, or potentially Essential, IPRs notified to ETSI in respect of ETSI standards"*, which is available from the ETSI Secretariat. Latest updates are available on the ETSI Web server (<http://ipr.etsi.org>).

Pursuant to the ETSI IPR Policy, no investigation, including IPR searches, has been carried out by ETSI. No guarantee can be given as to the existence of other IPRs not referenced in ETSI SR 000 314 (or the updates on the ETSI Web server) which are, or may be, or may become, essential to the present document.

Foreword

This Technical Specification (TS) has been produced by ETSI Technical Committee Smart Machine-to-Machine communications (SmartM2M).

Modal verbs terminology

In the present document "**shall**", "**shall not**", "**should**", "**should not**", "**may**", "**may not**", "**need**", "**need not**", "**will**", "**will not**", "**can**" and "**cannot**" are to be interpreted as described in clause 3.2 of the [ETSI Drafting Rules](#) (Verbal forms for the expression of provisions).

"**must**" and "**must not**" are **NOT** allowed in ETSI deliverables except when used in direct citation.

1 Scope

The present document specifies Interoperability Test Descriptions (TDs) for the ETSI M2M Primitives as specified in ETSI TS 102 921 [1]. The purpose of the interoperability testing is to prove that end-to-end functionality between devices such as:

- dIa interface;
- mIa interface;
- Multi-Hop configuration (dIa + mId) and (mId+mIa);
- End to End configuration (dIa + mId + mIa);

and using HTTP as underlying application layer, is as required by the standard(s) on which those devices are based.

2 References

2.1 Normative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the reference document (including any amendments) applies.

Referenced documents which are not found to be publicly available in the expected location might be found at <http://docbox.etsi.org/Reference>.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are necessary for the application of the present document.

- [1] ETSI TS 102 921: "Machine-to-Machine communications (M2M); mIa, dIa and mId interfaces".
- [2] ETSI TS 102 690: "Machine-to-Machine communications (M2M); Functional architecture".

2.2 Informative references

References are either specific (identified by date of publication and/or edition number or version number) or non-specific. For specific references, only the cited version applies. For non-specific references, the latest version of the reference document (including any amendments) applies.

NOTE: While any hyperlinks included in this clause were valid at the time of publication, ETSI cannot guarantee their long term validity.

The following referenced documents are not necessary for the application of the present document but they assist the user with regard to a particular subject area.

Not applicable.

3 Abbreviations

For the purposes of the present document, the following abbreviations apply:

| | |
|--------------|---|
| aPoC | The Application Point of Contract is a URI that identifies how requests are re-targeted |
| App | M2M Application (DA, GA or NA) |
| CFG | Configuration |
| DA | Device Application |
| Device' (D') | Hosts App that communicates to a GSCL using the dla reference point. |
| dIa | device application Interface |
| DSCL | Device SCL |
| EUT | Equipment Under Test |
| GA | Gateway Application |
| GSCL | Gateway SCL |
| MH | Multi-Hop |
| mIa | M2M application Interface |
| mId | M2M device Interface |
| NA | Network Application |
| NSCL | Network SCL |
| SCL | Service Capability Layer |
| TD | Test Description |
| URI | Universal Resource Identifier |
| XML | eXtensible Markup Language |

4 Conventions

4.1 The Test Description proforma

The test descriptions are provided in proforma tables. The following different types of test operator actions are considered during the test execution:

- A **stimulus** corresponds to an event that enforces an EUT to proceed with a specific protocol action, like sending a message for instance.
- A **verify** consists of verifying that the EUT behaves according to the expected behaviour (for instance the EUT behaviour shows that it receives the expected message).
- A **configure** corresponds to an action to modify the EUT configuration.
- A **check** ensures the receipt of protocol messages on reference points, with valid content. This "check" event type corresponds to the method called 'interoperability testing with conformance check'.

4.2 Test Description naming convention

Table 1: TD naming convention

| TD/<root>/<gr>/<nn> | | |
|--------------------------|-----|--|
| <root> = root | M2M | |
| <gr> = group | P2P | Point to Point testing on dla, mld or mla |
| | MH | Multi-Hop: management of remote ressources |
| | E2E | End to End |
| | | |
| <nn> = sequential number | | 01 to 99 |

5 Test Description Summary

5.1 ETSI M2M tests

Table 2: ETSI M2M Tests

| Nb | Procedure/Resource | TD ID | TD Description |
|----|-------------------------|---------------|--|
| 1 | SCL Mutual Registration | TD_M2M_P2P_01 | GSCL registers to NSCL |
| 2 | SclBase Management | TD_M2M_P2P_02 | App retrieves the sclBase resource via a sclBaseRetrieveRequest |
| 3 | | TD_M2M_P2P_03 | App updates the sclBase resource via an sclBaseUpdateRequest |
| 4 | | Application | TD_M2M_P2P_04 |
| 5 | TD_M2M_P2P_05 | | App retrieves application resource via an applicationRetrieveRequest |
| 6 | TD_M2M_P2P_06 | | App updates attribute in application resource via an applicationUpdateRequest |
| 7 | TD_M2M_P2P_07 | | App de-registers by deleting application resource via an applicationDeleteRequest |
| 8 | Container | | TD_M2M_P2P_08 |
| 9 | | TD_M2M_P2P_09 | App retrieves information of a container resource via a containerRetrieveRequest |
| 10 | | TD_M2M_P2P_10 | App updates attribute in application resource via an containerUpdateRequest |
| 11 | | TD_M2M_P2P_11 | App delete a specific container resource via a containerDeleteRequest |
| 12 | ContentInstance | TD_M2M_P2P_12 | App adds a contentInstance resource <contentInstance> to the contentInstances resource of a specific container in local SCL via a contentInstanceCreateRequest |
| 13 | | TD_M2M_P2P_13 | App adds a contentInstance resource <contentInstance> to the contentInstances resource of a specific container in local SCL via a contentInstanceCreateRequest using plain text data |
| 14 | | TD_M2M_P2P_14 | App retrieves information of a contentInstance resource via a containerRetrieveRequest |
| 15 | | TD_M2M_P2P_15 | Handle contentInstanceRetrieveRequest with targetID using partial addressing (content attribute) |
| 16 | | TD_M2M_P2P_16 | App deletes contentInstance resource via a containerDeleteRequest |
| 17 | | Discovery | TD_M2M_P2P_17 |
| 18 | TD_M2M_P2P_18 | | App discovers resources residing in Local SCL using specific Filter criteria via DiscoveryRetrieveRequest |
| 19 | TD_M2M_P2P_19 | | App discovers resources residing in Local SCL with a limited max size via DiscoveryRetrieveRequest |
| 20 | TD_M2M_P2P_20 | | App discovers resources residing in Local SCL limited search prefix via DiscoveryRetrieveRequest |
| 21 | TD_M2M_P2P_21 | | App discovers resources residing in Local SCL using multiple parameters via DiscoveryRetrieveRequest |
| 22 | Subscription | TD_M2M_P2P_22 | App creates a subscription to application resource via subscriptionCreateRequest |
| 23 | | TD_M2M_P2P_23 | App retrieves information about a subscription via subscriptionRetrieveRequest (GET), such as expirationTime, filterCriteria, contactURI, noRepresentation, timeoutReason, etc. |
| 24 | | TD_M2M_P2P_24 | App updates information about a subscription via subscriptionRetrieveRequest |
| 25 | | TD_M2M_P2P_25 | App cancels subscription via an subscriptionDeleteRequest |
| 26 | | TD_M2M_P2P_26 | SCL sends notification(s) via subscriptionNotifyRequest |
| 27 | | TD_M2M_P2P_27 | SCL sends notification(s) via subscriptionNotifyRequest (To application container) |

| Nb | Procedure/Resource | TD ID | TD Description |
|----|---------------------|---------------|--|
| 28 | NotificationChannel | TD_M2M_P2P_28 | App creates a notificationChannel to application resource via notificationChannelCreateRequest |
| 29 | | TD_M2M_P2P_29 | App retrieves information about a notificationChannel via notificationChannelRetrieveRequest |
| 30 | | TD_M2M_P2P_30 | App deletes a notificationChannel via a notificationChannelDeleteRequest |
| 31 | | TD_M2M_P2P_31 | NA/DA receives notifications via a notificationChannelRetrieveRequest (GET) using long polling |
| 32 | AccessRight | TD_M2M_P2P_32 | App create an AccessRight resource via an accessRightCreateRequest |
| 33 | | TD_M2M_P2P_33 | App retrieves accessRight resource via an accessRightRetrieveRequest |
| 34 | | TD_M2M_P2P_34 | App updates attribute in accessRight resource via an accessRightUpdateRequest |
| 35 | | TD_M2M_P2P_35 | App de-registers by deleting accessRight resource via an accessRightDeleteRequest |
| 36 | | TD_M2M_P2P_36 | App retrieve request is rejected due to an Empty Requesting Entity |
| 37 | | TD_M2M_P2P_37 | App retrieve request is rejected due to bad request Entity |
| 38 | | TD_M2M_P2P_38 | App delete request is rejected due to Access Rights |
| 39 | Group | TD_M2M_P2P_39 | App creates a group resource via a groupCreateRequest |
| 40 | | TD_M2M_P2P_40 | App retrieves group resource via a groupRetrieveRequest |
| 41 | | TD_M2M_P2P_41 | App updates attribute in group resource via an groupUpdateRequest |
| 42 | | TD_M2M_P2P_42 | App deletes group resource via an groupDeleteRequest |
| 43 | | TD_M2M_P2P_43 | App creates multiple contentInstance using group resource |
| 44 | | TD_M2M_P2P_44 | App retrieves multiple contentInstance using group resource |
| 45 | Container | TD_M2M_MH_01 | App creates a container resource in remote SCL via a containerCreateRequest |
| 46 | | TD_M2M_MH_02 | App retrieves information of a container resource via a containerRetrieveRequest |
| 47 | | TD_M2M_MH_03 | App updates attribute in application resource via an containerUpdateRequest |
| 48 | | TD_M2M_MH_04 | App delete a specific container resource via a containerDeleteRequest |
| 49 | ContentInstance | TD_M2M_MH_05 | App adds a contentInstance resource <contentInstance> to the contentInstances resource of a specific container in remote SCL via a contentInstanceCreateRequest |
| 50 | | TD_M2M_MH_06 | App adds a contentInstance resource <contentInstance> to the contentInstances resource of a specific container in remote SCL via a contentInstanceCreateRequest using Plain text |
| 51 | | TD_M2M_MH_07 | App retrieves remote contentInstance resource via a containerRetrieveRequest |
| 52 | | TD_M2M_MH_08 | Handle contentInstanceRetrieveRequest with targetID using partial addressing |
| 53 | | TD_M2M_MH_09 | App deletes remote contentInstance resource via a containerDeleteRequest |
| 55 | Discovery | TD_M2M_MH_10 | App discovers resources residing in remote SCL via DiscoveryRetrieveRequest |
| 56 | | TD_M2M_MH_11 | App discovers resources residing in remote SCL using specific Filter criteria via DiscoveryRetrieveRequest |
| 57 | | TD_M2M_MH_12 | App discovers resources residing in remote SCL with a limited max size via DiscoveryRetrieveRequest |
| 58 | | TD_M2M_MH_13 | App discovers resources residing in remote SCL limited search prefix via DiscoveryRetrieveRequest |
| 59 | | TD_M2M_MH_14 | App discovers resources residing in remote SCL using multiple parameters via DiscoveryRetrieveRequest |

| Nb | Procedure/Resource | TD ID | TD Description | |
|----|---------------------------------------|----------------------|---|---|
| 60 | Subscription | TD_M2M_MH_15 | App creates a subscription to application resource via subscriptionCreateRequest | |
| 61 | | TD_M2M_MH_16 | App retrieves information about a subscription via subscriptionRetrieveRequest (GET), such as expirationTime, filterCriteria, contactURI, noRepresentation, timeoutReason, etc. | |
| 62 | | TD_M2M_MH_17 | App updates information about a subscription via subscriptionRetrieveRequest | |
| 63 | | TD_M2M_MH_18 | App cancels subscription via an subscriptionDeleteRequest | |
| 64 | | TD_M2M_MH_19 | GSCL sends notification(s) via subscriptionNotifyRequest on NSCL | |
| 65 | | TD_M2M_MH_20 | NSCL sends notification(s) via subscriptionNotifyRequest on GSCL | |
| 66 | | TD_M2M_MH_21 | GSCL sends notification(s) via subscriptionNotifyRequest | |
| 67 | | TD_M2M_MH_22 | NSCL sends notification(s) via subscriptionNotifyRequest | |
| 68 | | Notification Channel | TD_M2M_MH_23 | App creates a notificationChannel to application resource on remote SCL via notificationChannelCreateRequest (POST) |
| 69 | | | TD_M2M_MH_24 | App retrieves information about a notificationChannel on remote SCL via notificationChannelRetrieveRequest (GET) |
| 70 | TD_M2M_MH_25 | | App deletes a notificationChannel on remote SCL via a notificationChannelDeleteRequest | |
| 71 | TD_M2M_MH_26 | | NA receives notifications via a notificationChannelRetrieveRequest (GET) using long polling | |
| 72 | TD_M2M_MH_27 | | DA receives notifications via a notificationChannelRetrieveRequest (GET) using long polling | |
| 73 | AccessRight | | TD_M2M_MH_28 | App creates an AccessRight resource via an accessRightCreateRequest |
| 74 | | TD_M2M_MH_29 | App retrieves accessRight resource via an accessRightRetrieveRequest | |
| 75 | | TD_M2M_MH_30 | App updates attribute in accessRight resource via an accessRightUpdateRequest | |
| 76 | | TD_M2M_MH_31 | App de-registers by deleting accessRight resource via an accessRightDeleteRequest | |
| 77 | | TD_M2M_MH_32 | App delete request is rejected due to Access Rights (Empty Requesting Entity) | |
| 78 | | TD_M2M_MH_33 | App retrieve request is rejected due to Access Rights (Bad Requesting Entity) | |
| 79 | | TD_M2M_MH_34 | App delete request is rejected due to Access Rights on remote SCL (Insufficient Access Rights) | |
| 80 | | Group | TD_M2M_MH_35 | App creates a group resource via a groupCreateRequest |
| 81 | TD_M2M_MH_36 | | App retrieves group resource via a groupRetrieveRequest | |
| 82 | TD_M2M_MH_37 | | App updates attribute in group resource via an groupUpdateRequest | |
| 83 | TD_M2M_MH_38 | | App delete group resource via an groupDeleteRequest | |
| 84 | TD_M2M_MH_39 | | App creates multiple contentInstance using group resource | |
| 85 | TD_M2M_MH_40 | | App retrieves multiple contentInstance using group resource | |
| 86 | TD_M2M_MH_41 | | App registration with Announcement | |
| 87 | TD_M2M_MH_42 | | App application delete with Announcement | |
| 88 | TD_M2M_MH_43 | | App application De-Announce resource | |
| 89 | Resource management with re-targeting | TD_M2M_E2E_01 | DA adds a contentInstance resource <contentInstance> to the contentInstances resource of a specific container in remote NSCL via a contentInstanceCreateRequest | |
| 90 | | TD_M2M_E2E_02 | NA adds a contentInstance resource <contentInstance> to the contentInstances resource of a specific container in remote GSCL via a contentInstanceCreateRequest | |
| 91 | | TD_M2M_E2E_03 | NA retrieves a contentInstance resource <contentInstance> to the contentInstances resource of a specific container in remote GSCL via a contentInstanceRetrieveRequest | |

6 Basic Configuration

6.1 Resources request samples

6.1.1 Application

```
POST 127.0.0.1:8080/context/nscl/applications
<tns:application xmlns:tns="http://uri.etsi.org/m2m" appId="appl" />
```

```
PUT 127.0.0.1:8080/context/nscl/applications/appl
<tns:application xmlns:tns="http://uri.etsi.org/m2m" >
  <tns:searchStrings>
    <tns:searchString>key</tns:searchString>
  </tns:searchStrings>
</tns:application>
```

```
GET 127.0.0.1:8080/context/nscl/applications/appl
DELETE 127.0.0.1:8080/context/nscl/applications/appl
```

6.1.2 Container

```
POST 127.0.0.1:8080/context/nscl/applications/appl/containers
<tns:container xmlns:tns="http://uri.etsi.org/m2m" tns:id="cont1" />
```

```
PUT 127.0.0.1:8080/context/nscl/applications/appl/containers/cont1
<tns:container xmlns:tns="http://uri.etsi.org/m2m">
  <tns:searchStrings>
    <tns:searchString>key</tns:searchString>
  </tns:searchStrings>
</tns:container>
```

```
GET 127.0.0.1:8080/context/nscl/applications/appl
DELETE 127.0.0.1:8080/context/nscl/applications/appl
```

6.1.3 ContentInstance

```
POST 127.0.0.1:8080/context/nscl/applications/appl/containers/cont1/contentInstances
<tns:contentInstance xmlns:tns="http://uri.etsi.org/m2m"
  xmlns:xmime="http://www.w3.org/2005/05/xmlmime" tns:id="cil" >
  <tns:content xmime:contentType="application/xml">
```

```
  PG9iaj4KICA8aW50IG5hbWU9ImRhdGEiIHZhbD0iMjciLz4KICA8aW50IG5hbWU9InVuaXQiIHZhbD0iY2Vsc3VzIi8+Cjwv
  b2JqPgoK
  </tns:content>
</tns:contentInstance>
```

```
POST(content) 127.0.0.1:8080/context/nscl/applications/appl/containers/cont1/contentInstances
<obj>
  <int name="data" val="27"/>
  <int name="unit" val="celsius"/>
</obj>
```

```
PUT 127.0.0.1:8080/context/nscl/applications/appl/containers/cont1
<tns:container xmlns:tns="http://uri.etsi.org/m2m">
  <tns:searchStrings>
    <tns:searchString>key</tns:searchString>
  </tns:searchStrings>
</tns:container>
```

```
GET 127.0.0.1:8080/context/nscl/applications/appl/containers/cont1/contentInstances/ci
```

```
GET (latest) 127.0.0.1:8080/context/nscl/applications/appl/containers/cont1/contentInstances/latest
```

```
GET (oldest) 127.0.0.1:8080/context/nscl/applications/appl/containers/cont1/contentInstances/oldest
```

```
GET (content)
127.0.0.1:8080/context/nscl/applications/appl/containers/cont1/contentInstances/ci/content
```

```
GET (latest content)
127.0.0.1:8080/context/nscl/applications/appl/containers/cont1/contentInstances/latest/content
```

```
GET (oldest content)
127.0.0.1:8080/context/nscl/applications/appl/containers/cont1/contentInstances/oldest/content
```

6.1.4 Subscription

```
POST 127.0.0.1:8080/context/nscl/applications/appl/containers/cont1/contentInstances/subscriptions
<tns:subscription xmlns:tns="http://uri.etsi.org/m2m" tns:id="sub1">
  <tns:contact>http://127.0.0.0:1400/monitor</tns:contact>
</tns:subscription>
```

```
GET
127.0.0.1:8080/context/nscl/applications/appl/containers/cont1/contentInstances/subscriptions/sub1
```

```
DELETE
127.0.0.1:8080/context/nscl/applications/appl/containers/cont1/contentInstances/subscriptions/sub1
```

6.1.5 AccessRight

```
POST 127.0.0.1:8080/context/nscl/accessRights
<tns:accessRight xmlns:tns="http://uri.etsi.org/m2m" tns:id="ar1">
  <tns:permissions>
    <tns:permission tns:id="AllRights">
      <tns:permissionFlags>

| groupCreateRequest | <groupGET> | <tns:group xmlns:tns="http://uri.etsi.org/m2m" tns:id="groupGET"> <tns:memberType>CONTAINER</tns:memberType> <tns:members> <reference>gscl/applications/app1/containers/cont1/contentInstances/latest</reference> <reference>gscl/applications/app2/containers/cont2/contentInstances/latest</reference> </tns:members> </tns:group> |

6.3 aPoc Re-Targeting Procedure

When App registers to its Local SCL it can:

- either use the aPoc Re-Targeting mechanism; or
- create and update contentInstance resource on the Local SCL.

As a consequence, when the Local SCL receives a resource retrieve request, it shall:

- either forward the request to App; or
- reply directly to the request itself.

6.4 M2M Settings

In order to ease test setup and execution, M2M SCL and Applications are requested to support the following settings:

- Security shall be disable as it is out of scope of the interoperability testing.
- HTTP mapping of ETSI M2M primitives is used.
- Resource names are pre-provisioned, except for content instance resources that are automatically assigned by the hosting SCL.
- Search strings are pre-provisioned identifying applications and containers.
- After each "Delete" primitive on a resource, the user shall check the resource is indeed effectively deleted.
- Unless it is indicated in the test cases prerequisites, by default, all the applications shall have the required access right to manage resources on SCL.

7 Test configurations

8 Test Descriptions

8.1 Point to Point configuration testing

8.1.1 SCL Mutual Registration

| Interoperability Test Description | | | |
|-----------------------------------|---|-------------|---|
| Identifier: | TD_M2M_P2P_01 | | |
| Objective: | GSCL registers to NSCL | | |
| Configuration: | M2M_CFG_02 | | |
| References: | ETSI TS 102 921 [1], clause 10.6.2 ETSI TS 102 690 [2], clause 9.3.2.2 | | |
| Pre-test conditions: | void | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | GSCL is requested to send a SCLCreateRequest (POST) to NSCL |
| | 2 | Check (mId) | Sent POST request contains: <ul style="list-style-type: none"> Request method = POST Request URI <nscl>/scls Host Content Type option Payload: <gscl> resource |
| | 3 | Check (mId) | NSCL sends response containing: <ul style="list-style-type: none"> Status Code = 201 Content-Location: <nscl>/scls/<gscl> Payload: created <gscl> resource |
| | 4 | Verify | NSCL and GSCL indicate successful operation |

8.1.2 SclBase Management

8.1.2.1 SclBase Retrieve

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_P2P_02 | | |
| Objective: | App retrieves the sclBase resource via a sclBaseRetrieveRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.4.3 ETSI TS 102 690 [2], clause 9.3.2.4 | | |
| Pre-test conditions: | sclBase resource has been automatically created in local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a retrieveRequest (GET) to local SCL |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request method = GET Request URI <sclBase> Host: localSCL Content Type option Payload: empty |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Status Code = 200 Payload: <sclBase> resource |
| | 4 | Verify (dla) | App indicates successful operation |

8.1.2.2 SclBase Update

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_P2P_03 | | |
| Objective: | App updates the sclBase resource via an sclBaseUpdateRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.4.4 | | |
| Pre-test conditions: | sclBase resource has been automatically created in local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an update Request (PUT) |
| | 2 | Check (dla/mla) | Sent PUT request contains: <ul style="list-style-type: none"> Request method = PUT Request URI <sclBase> Host: localSCL Content Type option Payload: modified <sclBase> resource |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Status Code = 200 Payload: updated <sclBase> resource |
| | 4 | Verify | App indicates successful operation |

8.1.3 Application Registration

8.1.3.1 Application Resource creation

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_P2P_04 | | |
| Objective: | App registers to its local SCL via an applicationCreateRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.8.2 ETSI TS 102 690 [2], clause 9.3.2.8 | | |
| Pre-test conditions: | void | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an applicationCreateRequest (POST) |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> Request method = POST Request URI <sclBase>/applications Host: localSCL Content Type option Payload: application resource <app> to be created |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Status Code = 201 Content-Location: <sclBase>/applications/<app> Payload: created <app> resource |
| | 4 | Verify | App indicates successful operation |

8.1.3.2 Application Retrieve

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_P2P_05 | | |
| Objective: | App retrieves application resource via an applicationRetrieveRequest (GET) | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.8.3 ETSI TS 102 690 [2], clause 9.3.2.8 | | |
| Pre-test conditions: | App has created an Application resource <app> on local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an applicationRetrieveRequest (GET) |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request method = GET Request URI <sclBase>/applications/<app> Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Status Code =200 Payload: <app> resource |
| | 4 | Verify | App indicates successful operation |

8.1.3.3 Application Update

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_P2P_06 | | |
| Objective: | App updates attribute in application resource via an applicationUpdateRequest (PUT) | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.8.4 ETSI TS 102 690 [2], clause 9.3.2.8 | | |
| Pre-test conditions: | App has created an Application resource <app> on local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an applicationUpdateRequest (PUT) |
| | 2 | Check (dla/mla) | Sent PUT request contains: <ul style="list-style-type: none"> Request method = PUT Request URI <sclBase>/applications/<app> Host: localSCL Payload: modified application resource |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: updated <app> resource |
| | 4 | Verify | App indicates successful operation |

8.1.3.4 Application Delete

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_P2P_07 | | |
| Objective: | App de-registers by deleting application resource via an applicationDeleteRequest (DELETE) | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.8.5 ETSI TS 102 690 [2], clause 9.3.2.8 | | |
| Pre-test conditions: | App has created an Application resource <app> on local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an applicationDeleteRequest (DELETE) |
| | 2 | Check (dla/mla) | Sent DELETE request contains: <ul style="list-style-type: none"> Request method = DELETE Request URI <sclBase>/applications/<app> Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | Local SCL sends response containing: <ul style="list-style-type: none"> Status Code = 204 Payload: empty |
| | 4 | Verify | App indicates successful operation |

8.1.4 Container Management

8.1.4.1 Container Create

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_P2P_08 | | |
| Objective: | App creates a container resource in local SCL via a containerCreateRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.14.2 ETSI TS 102 690 [2], clause 9.3.2.12 | | |
| Pre-test conditions: | Application <app> has been created in Local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a containerCreateRequest (POST) |
| | 2 | Check (dla/mla) | Sent POST request contains <ul style="list-style-type: none"> Request URI <sclBase>/applications/<app>/containers/<container> Host: localSCL Payload: container resource <container> to be created |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 201 Content-Location: <sclBase>/applications/<app>/containers/<container> Payload: Created <container> |
| | 4 | Verify | App indicates successful operation |
| | 5 | | Repeat step 1-4 creating container resource with short lifetime |
| | 6 | | Check the created resource is removed after the expiry of its lifetime |

8.1.4.2 Container Retrieve

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|--|
| Identifier: | TD_M2M_P2P_09 | | |
| Objective: | App retrieves information of a container resource via a containerRetrieveRequest (GET) | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.14.3 ETSI TS 102 690 [2], clause 9.3.2.12 | | |
| Pre-test conditions: | App has created a container resource <container> in application <app> on the local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a containerRetrieveRequest (GET) for resource <container> |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI <sclBase>/applications/<app>/containers/<container> Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: <container> resource |
| | 4 | Verify | App indicates successful operation |

8.1.4.3 Container Update

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|--|
| Identifier: | TD_M2M_P2P_10 | | |
| Objective: | App updates attribute in application resource via an containerUpdateRequest (PUT) | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.14.3 ETSI TS 102 690 [2], clause 9.3.2.12 | | |
| Pre-test conditions: | App has created a container resource <container> in application <app> on the local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an containerUpdateRequest (PUT) to update the lifetime of the resource. |
| | 2 | Check (dla/mla) | Sent PUT request contains: <ul style="list-style-type: none"> Request URI <sclBase>/applications/<app>/containers/<container> Host: localSCL Payload: modified <container> resource |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: Updated <container> resource |
| | 4 | Verify | App indicates successful operation |

8.1.4.4 Container Delete

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_P2P_11 | | |
| Objective: | App delete a specific container resource via a containerDeleteRequest (DELETE) | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.14.3 ETSI TS 102 690 [2], clause 9.3.2.12 | | |
| Pre-test conditions: | App has created a container resource <container> in application <app> on the local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an containerDeleteRequest (DELETE) |
| | 2 | Check (dla/mla) | Sent DELETE request contains: <ul style="list-style-type: none"> Request URI <sclBase>/applications/<app>/containers/<container> Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | Local SCL sends response containing: <ul style="list-style-type: none"> Code = 204 Payload: empty |
| | 4 | Verify | App indicates successful operation |

8.1.5 ContentInstance Management

8.1.5.1 Content Instance Create

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|--|
| Identifier: | TD_M2M_P2P_12 | | |
| Objective: | App adds a contentInstance resource <contentInstance> to the contentInstances resource of a specific container in local SCL via a contentInstanceCreateRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.19.2 ETSI TS 102 690 [2], clause 9.3.2.15 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an Application resource <app> on SCL (Registered into local SCL) App has created a container resource <container> in <app> on local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a contentInstanceCreateRequest (POST) |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> Request URI <sclBase>/applications/<app>/containers/<container>/contentInstances Host: localSCL Payload: ContentInstance resource <contentInstance> to be created |
| | 3 | Check (dla/mla) | Local SCL sends response containing: <ul style="list-style-type: none"> Code = 201 Content-Location: <sclBase>/applications/<app>/containers/<container>/contentInstances/<contentInstance> Payload: <contentInstance> resource |
| | 4 | Verify | App indicates successful operation |
| | 5 | | Repeat steps 1-4 for a contentInstance of a locationcontainer resource |

8.1.5.2 Content Instance Create using plain text

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_P2P_13 | | |
| Objective: | App adds a contentInstance resource <contentInstance> to the contentInstances resource of a specific container in local SCL via a contentInstanceCreateRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.19.2 ETSI TS 102 690 [2], clause 9.3.2.15 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> Application <app> and associated container <container> have been created on local SCL App has discovered the <app> and <container> on local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a contentInstanceCreateRequest (POST) using plain text data |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> Request URI <localSCL>/applications/<app>/containers/<container>/contentInstances Host: localSCL Payload: "plain text" to be created |
| | 3 | Verify | local SCL indicates successful operation |
| | 4 | Check (dla/mla) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 201 Content-Location: <sclBase>/ applications/<app>/containers/<container>/contentInstances/<contentInstance> Payload: <contentInstance> resource containing "plain text" as content |
| | 5 | Verify | App indicates successful operation |
| | 6 | | Repeat steps 1-5 for a contentInstance of a locationcontainer resource |

8.1.5.3 Content Instance Retrieve

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_P2P_14 | | |
| Objective: | App retrieves information of a contentInstance resource via a containerRetrieveRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.19.3 ETSI TS 102 690 [2], clause 9.3.2.15 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an application resource <app> on local SCL App has created a container resource <container> in <app> on local SCL App has created a contentInstance resource <contentInstance> residing under the <container> resource. | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a containerRetrieveRequest (GET) for retrieving the attributes/meta-data and the opaque data of a <contentInstance> resource |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI <sclBase>/applications/<app>/containers/<container>/contentInstances/<contentInstance> Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | Local SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: <contentInstance> resource |
| | 4 | Verify | App indicates successful operation |
| | 5 | | Repeat steps 1-4 for a contentInstance of a locationcontainer resource |
| | 6 | | Repeat steps 1-4 using "latest" instead of <contentInstance> to get the latest contentInstance |
| | 7 | | Repeat steps 1-4 using "oldest" instead of <contentInstance> to get the oldest contentInstance |

8.1.5.4 ContentInstance Content retrieve (partial addressing)

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|--|
| Identifier: | TD_M2M_P2P_15 | | |
| Objective: | Handle contentInstanceRetrieveRequest with targetID using partial addressing (content attribute) | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.19.3 ETSI TS 102 690 [2], clause 9.3.2.15 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an application resource <app> on local SCL App has created a container resource <container> in <app> on local SCL App has created a contentInstance resource <contentInstance> residing under the <container> resource | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a containerRetrieveRequest (GET) for retrieving the content attribute of a <contentInstance> resource |
| | 2 | Check (dla/mla) | Sent GET request contains <ul style="list-style-type: none"> Request URI <sclBase>/applications/<app>/containers/<container>/contentInstances/<contentInstance>/content Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | Local SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: value of the content attribute |
| | 4 | Verify | App indicates successful operation |
| | 5 | | Repeat steps 1-4 to get a content of a contentInstance residing in locationcontainer resource. |

8.1.5.5 Content Instance Delete

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_P2P_16 | | |
| Objective: | App deletes contentInstance resource via a containerDeleteRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.19.2 ETSI TS 102 690 [2], clause 9.3.2.15 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created a container resource <container> on local SCL App has created a contentInstance resource <contentInstance> residing under a <container> resource. | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a contentInstanceDeleteRequest (DELETE) |
| | 2 | Check (dla/mla) | Sent DELETE request contains: <ul style="list-style-type: none"> Request URI <sclBase>/containers/<container>/contentInstances/<contentInstance> Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | local SCL sends response containing: <ul style="list-style-type: none"> Code = 204 Payload: empty |
| | 4 | Verify | App indicates successful operation |

8.1.6 Discovery Management

8.1.6.1 Discovery of all resources

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|--|
| Identifier: | TD_M2M_P2P_17 | | |
| Objective: | App discovers resources residing in Local SCL via DiscoveryRetrieveRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an Application resource <app> on local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a DiscoveryRetrieveRequest in order to discover resources under resource /discovery located in local SCL |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI <sclBase>/discovery Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: Discovery resource including references to all resources residing in Local SCL |
| | 4 | Verify | App indicates successful operation |

8.1.6.2 Discovery with Filter Criteria

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_P2P_18 | | |
| Objective: | App discovers resources residing in Local SCL using specific Filter criteria via DiscoveryRetrieveRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an Application resource <app> on local SCL with searchString=key1 | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a DiscoveryRetrieveRequest in order to discover resources under a well known resource /discovery located in local SCL |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI <sclBase>/discovery?searchString =key1 Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: Discovery resource including references to <app> |
| | 4 | Verify | App indicates successful operation |

8.1.6.3 Discovery with max size

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_P2P_19 | | |
| Objective: | App discovers resources residing in Local SCL with a limited max size via DiscoveryRetrieveRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an Application resource <app> on SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a DiscoveryRetrieveRequest in order to discover resources under resource /discovery located in local SCL |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI <sclBase>/discovery?maxSize=2 Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: Trunked Discovery resource including only 2 resource references |
| | 4 | Verify | App indicates successful operation |

8.1.6.4 Discovery with searchPrefix

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_P2P_20 | | |
| Objective: | App discovers resources residing in Local SCL limited search prefix via DiscoveryRetrieveRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an Application resource <app> on SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a DiscoveryRetrieveRequest in order to discover resources under a resource <i>/discovery</i> located in local SCL |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI: <sclBase>/discovery?searchPrefix=<sclBase>/applications Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: Discovery resource including only resources under <sclBase>/applications |
| | 4 | Verify | App indicates successful operation |

8.1.6.5 Discovery with multiple parameters

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_P2P_21 | | |
| Objective: | App discovers resources residing in Local SCL using multiple parameters via DiscoveryRetrieveRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an Application resource <app> on local SCL with searchString=key1 and searchString=key2 | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a DiscoveryRetrieveRequest in order to discover resources under a well known resource <i>/discovery</i> located in local SCL |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI <sclBase>/discovery?searchString=key1 &searchString=key2&maxSize=1&searchPrefix=<sclBase>/applications Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: Discovery resource including a reference to <app> |
| | 4 | Verify | App indicates successful operation |

8.1.7 Subscription Management

8.1.7.1 Subscription Create

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_P2P_22 | | |
| Objective: | App creates a subscription to application resource via subscriptionCreateRequest (POST) | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an application resource <app> on local SCL App has created a container resource <container> on local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a subscriptionCreateRequest (POST) |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> Request URI: <sclBase>/applications/<app>/containers/<container>/contentInstances/subscriptions Host: localSCL Payload: subscription <sub> resource to be created |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 201 Content-Location: <sclBase>/applications/<app>/containers/<container>/contentInstances/subscriptions/<sub> Payload: Created <sub> resource |
| | 4 | Verify | App indicates successful operation |

8.1.7.2 Subscription Retrieve

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|--|
| Identifier: | TD_M2M_P2P_23 | | |
| Objective: | App retrieves information about a subscription via subscriptionRetrieveRequest (GET), such as expirationTime, filterCriteria, contactURI, noRepresentation, timeoutReason, etc. | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an application resource <app> on local SCL App has created a container resource <container> on local SCL App has created a subscription resource <sub> on Local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a subscriptionRetrieveRequest (GET) for retrieving information about a subscription <sub> |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI: <sclBase>/applications/<app>/containers/<container>/contentInstances/subscriptions/<sub> Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: <sub> resource |
| | 4 | Verify | App indicates successful operation |

8.1.7.3 Subscription Update

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|--|
| Identifier: | TD_M2M_P2P_24 | | |
| Objective: | App updates information about a subscription via subscriptionRetrieveRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created a subscription resource <sub> on local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a subscriptionRetrieveRequest (PUT) to update the lifetime of the resource |
| | 2 | Check (dla/mla) | Sent PUT request contains: <ul style="list-style-type: none"> Request URI: <sciBase>/applications/<app>/containers/<container>/contentInstances/subscriptions/<sub> Host: localSCL Payload: Modified <sub> resource |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: Modified <sub> resource |
| | 4 | Verify | App indicates successful operation |

8.1.7.4 Subscription Delete

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_P2P_25 | | |
| Objective: | App cancels subscription via an subscriptionDeleteRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an application resource <app> on local SCL App has created a container resource <container> on local SCL App has created a subscription resource <sub> on Local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a subscriptionDeleteRequest |
| | 2 | Check (dla/mla) | Sent DELETE request contains: <ul style="list-style-type: none"> Request URI: <sciBase>/applications/<app>/containers/<container>/contentInstances/subscriptions/<sub> Host: localSCL Payload: Empty |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 204 Payload: Empty |
| | 4 | Verify | App indicates successful operation |

8.1.7.5 Subscription Notify (To server-capable application)

| Interoperability Test Description | | |
|-----------------------------------|--|--|
| Identifier: | TD_M2M_P2P_26 | |
| Objective: | SCL sends notification(s) via subscriptionNotifyRequest | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | |
| Pre-test conditions: | <ul style="list-style-type: none"> App2 has created an Application resource <app> with its associated container <container> on local SCL App1 shall be server capable App1 has created subscription <sub> to <container> contentInstances resource on local SCL using a "contactURI" A listener is listening on "contactURI" to check the notify | |
| Test Sequence: | Step | Description |
| | 1 | Stimulus App2 is requested to send a contentInstanceCreateRequest (POST) |
| | 2 | Check (dla/mla) Sent POST request contains: <ul style="list-style-type: none"> URI:<sclBase>/applications/<app>/containers/<container>/contentInstances Payload: <contetnInstance> resource Host: localSCL |
| | 3 | Check (dla/mla) Local SCL sends response containing: <ul style="list-style-type: none"> Code = 201 Location:<sclBase>/applications/<app>/containers/<container>/contentInstances/<contetnInstance> Payload: created <contetnInstance> resource |
| | 4 | Verify App2 indicates successful operation |
| | 5 | Verify SCL sends subscriptionNotifyRequest (POST) |
| | 6 | Check (dla/mla) Sent POST request contains: <ul style="list-style-type: none"> Request URI: App1 listener contactURI Host: listener host Payload: <notify> resource containing the <contentInstance> resource |
| | 7 | Verify App1 sends subscriptionNotifyResponse |
| | 8 | Check (dla) App1 sends response containing: <ul style="list-style-type: none"> Code = 201 Payload: empty |
| | 9 | Verify App1 indicates successful operation |

8.1.7.6 Subscription Notify (To application container)

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|--|
| Identifier: | TD_M2M_P2P_27 | | |
| Objective: | SCL sends notification(s) via subscriptionNotifyRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App2 has created an Application resource <app2> with its associated container <container2> on local SCL App1 has created an Application resource <app1> with its associated <container1> App1 has created a subscription <sub> to <container2> contentInstances resource on local SCL using: <sclBase>/applications/<app1>/containers/<container1> as "contactURI" | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App2 is requested to send a contentInstanceCreateRequest (POST) |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> URI:<sclBase>/applications/<app2>/containers/<container2>/contentInstances Payload: <contetnInstance> resource Host: localSCL |
| | 3 | Check (dla/mla) | Local SCL sends response containing: <ul style="list-style-type: none"> Code = 201 Location:<sclBase>/applications/<app2>/containers/<container2>/contentInstances/<contetnInstance> Payload: created <contetnInstance> resource |
| | 4 | Verify | App2 indicates successful operation |
| | 5 | Verify | SCL sends subscriptionNotifyRequest (POST) |
| | 6 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> Request URI: <sclBase>/applications/<app2>/containers/<container2>/contentInstances Host: local SCL Payload: <notify> resource containing the <contentInstance> resource |
| | 7 | Verify | SCL sends subscriptionNotifyResponse |
| | 8 | Check (dla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 201 Payload: empty |
| | 9 | Verify | SCL indicates successful operation |

8.1.8 Notification Channel Management

8.1.8.1 NotificationChannel Create

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_P2P_28 | | |
| Objective: | App creates a notificationChannel to application resource via notificationChannelCreateRequest (POST) | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an application resource <app> on local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a notificationChannelCreateRequest (POST) |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> Request URI: <sclBase>/applications/<app>/notificationChannels Host: localSCL Payload: notificationChannel <nc> resource to be created |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 201 Content-Location: <sclBase>/applications/<app>/notificationChannels/<nc> Payload: NotificationChannel <nc> resource |
| | 4 | Verify | App indicates successful operation |

8.1.8.2 NotificationChannel Retrieve

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|--|
| Identifier: | TD_M2M_P2P_29 | | |
| Objective: | App retrieves information about a notificationChannel via notificationChannelRetrieveRequest (GET). | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created a notificationChannel resource <nc> on local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a notificationChannelRetrieveRequest (GET) for retrieving information about a notificationChannel <nc> |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI: <sclBase>/applications/<app>/notificationChannels/<nc> Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: notificationChannel <nc> resource |
| | 4 | Verify | App indicates successful operation |

8.1.8.3 NotificationChannel Delete

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_P2P_30 | | |
| Objective: | App deletes a notificationChannel via a notificationChannelDeleteRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created a notificationChannel resource <nc> on local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a notificationChannelDeleteRequest |
| | 2 | Check (dla/mla) | Sent DELETE request contains: <ul style="list-style-type: none"> Request URI: <sclBase>/applications/<app>/notificationChannels/<nc> Host: localSCL Payload: Empty |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 204 Payload: Empty |
| | 4 | Verify | App indicates successful operation |

8.1.8.4 Long polling based notifications

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|--|
| Identifier: | TD_M2M_P2P_31 | | |
| Objective: | NA/DA receives notifications via a notificationChannelRetrieveRequest (GET) using long polling. | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App1 has created an application resource <app1> with its associated container <container> on local SCL App2 has created an application resource <app2> on local SCL App2 has created a notificationChannel resource <nc> to <app2> and obtained a "ContactURI" and a "LongPollingURI" (element in the channelData attribute) App2 has sent a retrieve request to the provided "LongPollingURI" App2 has subscribed to <app1> <container> contentInstances resource using the provided "ContactURI" | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App1 is requested to send a contentInstanceCreateRequest (POST) to create content instance on its corresponding <container>. |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> URI:<sclBase>/applications/<app1>/containers/<container>/contentInstances Payload: <contentInstance> resource Host: localSCL |
| | 3 | Check (dla/mla) | Local SCL sends response containing: <ul style="list-style-type: none"> Code = 201 Location:<sclBase>/applications/<app1>/containers/<container>/contentInstances/<contentInstance> Payload: created <contentInstance> resource |
| | 4 | Verify | App1 indicates successful operation |
| | 5 | Verify | SCL correlates the "contactURI" to the notificationChannel <nc> and finds a long polling request active on "longPollingURI" related to App2 SCL sends a notificationChannelRetrieveResponse to App2 |
| | 6 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: <notify> resource containing the <contentInstance> resource |
| | 7 | Verify | App2 indicates successful operation |
| | 8 | Verify | App2 sends a new notificationChannelRetrieveResponse to the "LongPollingURI" and waits for the next event |

8.1.9 AccessRight Management

8.1.9.1 AccessRight Resource creation

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|--|
| Identifier: | TD_M2M_P2P_32 | | |
| Objective: | App create an AccessRight resource via an accessRightCreateRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.11.2 ETSI TS 102 690 [2], clause 9.3.2.10 | | |
| Pre-test conditions: | void | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an accessRightCreateRequest (POST) |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> Request method = POST Request URI <sclBase>/accessRights Host: localSCL Payload: application resource <accessRight> to be created |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Status Code = 201 Content-Location: <sclBase>/accessRights/<accessRight> Payload: created <accessRight> resource |
| | 4 | Verify | App indicates successful operation |

8.1.9.2 AccessRight Retrieve

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_P2P_33 | | |
| Objective: | App retrieves accessRight resource via an accessRightRetrieveRequest (GET) | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.11.3 ETSI TS 102 690 [2], clause 9.3.2.10 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an accessRight resource <accessRight> on local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a accessRightRetrieveRequest (GET) |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request method = GET Request URI <sclBase>/accessRights/<accessRight> Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Status Code =200 Payload: <app> resource |
| | 4 | Verify | App indicates successful operation |

8.1.9.3 AccessRight Update

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_P2P_34 | | |
| Objective: | App updates attribute in accessRight resource via an accessRightUpdateRequest (PUT) | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.11.4 ETSI TS 102 690 [2], clause 9.3.2.10 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an accessRight resource <accessRight> on SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an accessRightUpdateRequest (PUT) |
| | 2 | Check (dla/mla) | Sent PUT request contains: <ul style="list-style-type: none"> Request method = PUT Request URI <sclBase>/accessRights/<accessRight> Host: localSCL Payload: modified accessRight resource |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: updated <accessRight> resource |
| | 4 | Verify | App indicates successful operation |

8.1.9.4 AccessRight Delete

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|--|
| Identifier: | TD_M2M_P2P_35 | | |
| Objective: | App de-registers by deleting accessRight resource via an accessRightDeleteRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.11.5 ETSI TS 102 690 [2], clause 9.3.2.10 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an accessRight resource <accessRight> on SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an accessRightDeleteRequest (DELETE) |
| | 2 | Check (dla/mla) | Sent DELETE request contains Request method DELETE <ul style="list-style-type: none"> Request URI <sclBase>/accessRights/ <accessRight> Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | local SCL sends response containing: <ul style="list-style-type: none"> Status Code = 204 Payload: empty |
| | 4 | Verify | App indicates successful operation |

8.1.9.5 Unauthorized operation (Empty Requesting Entity)

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_P2P_36 | | |
| Objective: | App retrieve request is rejected due to an Empty Requesting Entity | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.11.1 ETSI TS 102 690 [2], clause 9.3.2.10 | | |
| Pre-test conditions: | | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an sclBaseRetrieveRequest (GET) for resource <sclBase> with an empty requestingEntity. |
| | 2 | Check (dla/mla) | Sent GET request contains <ul style="list-style-type: none"> Request URI <sclBase> Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | Local SCL sends response containing: <ul style="list-style-type: none"> Code = 401 (unauthorized operation) Payload: ErrorInfo resource |
| | 4 | Verify | App indicates unsuccessful operation |

8.1.9.6 Unauthorized operation (Bad Requesting Entity)

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_P2P_37 | | |
| Objective: | App retrieve request is rejected due to bad request Entity. | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.11.1 ETSI TS 102 690 [2], clause 9.3.2.10 | | |
| Pre-test conditions: | void | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an sclBaseRetrieveRequest (GET) for resource <sclBase> with a bad requestingEntity. |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI <sclBase> Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | Local SCL sends response containing: <ul style="list-style-type: none"> Code = 401 (unauthorized operation) Payload: ErrorInfo resource |
| | 4 | Verify | App indicates unsuccessful operation |

8.1.9.7 Unauthorized operation (Insufficient Access Rights)

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_P2P_38 | | |
| Objective: | App delete request is rejected due to Access Rights | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.11.1 ETSI TS 102 690 [2], clause 9.3.2.10 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an application <app> on local SCL App has created an access Right <ar1> on <app>, which forbids to delete container App has created a container resource <container> in application <app>, using the access right <ar1> | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a containerDeleteRequest (DELETE) for resource <container> |
| | 2 | Check (dla/mla) | Sent DELETE request contains: <ul style="list-style-type: none"> Request URI <sclBase>/applications/<app>/containers/<container> Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | Local SCL sends response containing: <ul style="list-style-type: none"> Code = 401 (unauthorized operation) Payload: ErrorInfo resource |
| | 4 | Verify | App indicates unsuccessful operation |

8.1.10 Group Management

8.1.10.1 Group Resource creation

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|--|
| Identifier: | TD_M2M_P2P_39 | | |
| Objective: | App creates a group resource via a groupCreateRequest | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.21.2 ETSI TS 102 690 [2], clause 9.3.2.17 | | |
| Pre-test conditions: | void | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a groupCreateRequest (POST) |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> Request method = POST Request URI <sclBase>/groups Host: localSCL Payload: Group resource <group> to be created |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Status Code = 201 Content-Location: <sclBase>groups/<group> Payload: created <group> resource |
| | 4 | Verify | App indicates successful operation |

8.1.10.2 Group Retrieve

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_P2P_40 | | |
| Objective: | App retrieves group resource via a groupRetrieveRequest (GET) | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.21.3 ETSI TS 102 690 [2], clause 9.3.2.17 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created a Group resource <group> on local SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a groupRetrieveRequest (GET) |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request method = GET Request URI <sclBase>/groups/<group> Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Status Code =200 Payload: <group> resource |
| | 4 | Verify | App indicates successful operation |

8.1.10.3 Group Update

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_P2P_41 | | |
| Objective: | App updates attribute in group resource via an groupUpdateRequest (PUT) | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.21.4 ETSI TS 102 690 [2], clause 9.3.2.17 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created a group resource <group> on SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a groupUpdateRequest (PUT) |
| | 2 | Check (dla/mla) | Sent PUT request contains: <ul style="list-style-type: none"> Request method = PUT Request URI <sclBase>/groups/<group> Host: localSCL Payload: modified group resource |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: updated <group> resource |
| | 4 | Verify | App indicates successful operation |

8.1.10.4 Group Delete

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_P2P_42 | | |
| Objective: | App deletes group resource via a groupDeleteRequest (DELETE) | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.21.5 ETSI TS 102 690 [2], clause 9.3.2.17 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created a group resource <group> on SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a groupDeleteRequest (DELETE) |
| | 2 | Check (dla/mla) | Sent DELETE request contains: <ul style="list-style-type: none"> Request method = DELETE Request URI <sclBase>/groups/<group> Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | Local SCL sends response containing: <ul style="list-style-type: none"> Status Code = 204 Payload: empty |
| | 4 | Verify | App indicates successful operation |

8.1.10.5 Group Operations (Create)

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|--|
| Identifier: | TD_M2M_P2P_43 | | |
| Objective: | App creates multiple contentInstance using group resource | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.21.2 ETSI TS 102 690 [2], clause 9.3.2.17 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App1 has created an application <app1> with its associated container <cont1> App2 has created an application <app2> resource with its associated container <cont2> App3 has created a group resource <groupPOST> on local SCL using the provided representation in ref. (the groupPOST representation should include <cont1>contentInstances and <cont2> contentInstances as members) | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App3 is requested to send a membersContentCreateRequest (POST) |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> Request method = POST Request URI: <sclBase>/groups/<groupPOST>/membersContent Host: localSCL Payload: ContentInstance resource <contentInstance> to be created |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Status Code = 201 Content-Location: <sclBase>groups/<groupPOST> Payload: membersContent resource |
| | 4 | Verify | App indicates successful operation Verify that <contentInstance> is created on <cont1> and <cont2> |

8.1.10.6 Group Operations (Retrieve)

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_P2P_44 | | |
| Objective: | App retrieves multiple contentInstance using group resource | | |
| Configuration: | M2M_CFG_01, M2M_CFG_03, M2M_CFG_07, M2M_CFG_09 | | |
| References: | ETSI TS 102 921 [1], clause 10.21.2 ETSI TS 102 690 [2], clause 9.3.2.17 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App1 has created an application <app1> with its associated container <cont1> App2 has created an application <app2> resource with its associated container <cont2> App3 has created a group resource <groupGET> on local SCL using the provided representation in ref. (the groupGET representation should include App1contentInstances and App2 contentInstances as members) | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App3 is requested to send a membersContentRetrieveRequest (GET) |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request method = GET Request URI <sclBase>/groups/<groupGET>/membersContent Host: localSCL Payload: empty |
| | 3 | Check (dla/mla) | SCL sends response containing: <ul style="list-style-type: none"> Status Code = 200 Payload: memberContents resource |
| | 4 | Verify | App3 indicates successful operation Verify that App3 received <cont1> and <cont2> contentInstances representations |

8.2 Multi-Hop configuration testing

8.2.1 Container Management on remote SCL

8.2.1.1 Container Create

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|--|
| Identifier: | TD_M2M_MH_01 | | |
| Objective: | App creates a container resource in remote SCL via a containerCreateRequest | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.14.2 ETSI TS 102 690 [2], clause 9.3.2.12 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> Application <app> has been created on remote SCL App has discovered the <app> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a containerCreateRequest (POST) |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/applications/<app>/containers/<container> Host :localSCL Payload: container resource <container> to be created |
| | 3 | Check (mld) | Forwarded POST request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/applications/<app>/containers/<container> Host :remoteSCL Payload: container resource <container> to be created |
| | 4 | Verify | Remote SCL indicates successful operation |

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 201 Content-Location: <remoteSCL>/applications/<app>/containers/<container> Payload: Created <container> |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 201 Content-Location: <remoteSCL>/applications/<app>/containers/<container> Payload: Created <container> |
| | 7 | Verify | App indicates successful operation |
| | 8 | | Repeat step 1-7 creating container resource with short lifetime |
| | 9 | Verify | Check the created resource is removed after the expiry of its lifetime |

8.2.1.2 Container Retrieve

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|--|
| Identifier: | TD_M2M_MH_02 | | |
| Objective: | App retrieves information of a container resource via a containerRetrieveRequest (GET) | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.14.3 ETSI TS 102 690 [2], clause 9.3.2.12 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> Application <app> and associated container <container> have been created on remote SCL App has discovered the <app> and <container> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a containerRetrieveRequest (GET) for resource <container> |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/applications/<app>/containers/<container> Host :localSCL Payload: empty |
| | 3 | Check (mld) | Forwarded GET request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/applications/<app>/containers/<container> Host: remoteSCL Payload: empty |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: <container> resource |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 200 Payload: <container> resource |
| | 7 | Verify | App indicates successful operation |

8.2.1.3 Container Update

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|--|
| Identifier: | TD_M2M_MH_03 | | |
| Objective: | App updates attribute in application resource via an containerUpdateRequest (PUT) | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.14.3 ETSI TS 102 690 [2], clause 9.3.2.12 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> Application <app> and associated container <container> have been created on remote SCL App has discovered the <app> and <container> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an containerUpdateRequest (PUT) to update the lifetime of the resource. |
| | 2 | Check (dla/mla) | Sent PUT request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/applications/<app>/containers/<container> Host: localSCL Payload: modified <container> resource |
| | 3 | Check (mld) | Forwarded PUT request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/applications/<app>/containers/<container> Host: remoteSCL Payload: modified <container> resource |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: Updated <container> resource |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 200 Payload: Updated <container> resource |
| | 7 | Verify | App indicates successful operation |

8.2.1.4 Container Delete

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_MH_04 | | |
| Objective: | App deletes a specific container resource via a containerDeleteRequest (DELETE) | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.14.3 ETSI TS 102 690 [2], clause 9.3.2.12 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> Application <app> and associated container <container> have been created on remote SCL App has discovered the <app> and <container> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an containerDeleteRequest (DELETE) |
| | 2 | Check (dla/mla) | Sent DELETE request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/applications/<app>/containers/<container> Host: localSCL Payload: empty |
| | 3 | Check (mld) | Forwarded DELETE request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/applications/<app>/containers/<container> Host: remoteSCL Payload: empty |
| | 4 | Verify | Remote SCL indicates successful operation |

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|--|
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 204 Payload: empty |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 204 Payload: empty |
| | 7 | Verify | App indicates successful operation |

8.2.2 ContentInstance Management on remote SCL

8.2.2.1 Content Instance Create

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_MH_05 | | |
| Objective: | App adds a contentInstance resource <contentInstance> to the contentInstances resource of a specific container in remote SCL via a contentInstanceCreateRequest | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.19.2 ETSI TS 102 690 [2], clause 9.3.2.15 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> Application <app> and associated container <container> have been created on remote SCL App has discovered the <app> and <container> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a contentInstanceCreateRequest (POST) |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/applications/<app>/containers/<container>/contentInstances Host: localSCL Payload: ContentInstance resource <contentInstance> to be created |
| | 3 | Check (mld) | Forwarded POST request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/applications/<app>/containers/<container>/contentInstances Host: remoteSCL Payload: ContentInstance resource <contentInstance> to be created |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (dla/mla) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 201 Content-Location: <remoteSCL>/applications/<app>/containers/<container>/contentInstances/<contentInstance> Payload: <contentInstance> resource |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 201 Content-Location: <remoteSCL>/applications/<app>/containers/<container>/contentInstances/<contentInstance> Payload: <contentInstance> resource |
| | 7 | Verify | App indicates successful operation |
| | 8 | | Repeat steps 1-7 for a contentInstance of a locationcontainer resource |

8.2.2.2 Content Instance Create using plain text

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_MH_06 | | |
| Objective: | App adds a contentInstance resource <contentInstance> to the contentInstances resource of a specific container in remote SCL via a contentInstanceCreateRequest | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.19.2 ETSI TS 102 690 [2], clause 9.3.2.15 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> Application <app> and associated container <container> have been created on remote SCL App has discovered the <app> and <container> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a contentInstanceCreateRequest (POST) using plain text data |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/applications/<app>/containers/<container>/contentInstances Host: localSCL Payload: "plain text" to be created |
| | 3 | Check (mld) | Forwarded POST request contains: <ul style="list-style-type: none"> Request URI <sclBase>/applications/<app>/containers/<container>/contentInstances Host: remoteSCL Payload: "plain text" to be created |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 201 Content-Location: < remoteSCL>/applications/<app>/containers/<container>/contentInstances/<contentInstance> Payload: <contentInstance> resource containing "plain text" as content |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 201 Content-Location: < remoteSCL>/applications/<app>/containers/<container>/contentInstances/<contentInstance> Payload: <contentInstance> resource containing "plain text" as content |
| | 7 | Verify | App indicates successful operation |
| | 8 | | Repeat steps 1-7 for a contentInstance of a locationcontainer resource |

8.2.2.3 Content Instance Retrieve

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_MH_07 | | |
| Objective: | App retrieves information of a contentInstance resource via a containerRetrieveRequest on a Remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.19.3 ETSI TS 102 690 [2], clause 9.3.2.15 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> Application <app> and associated container <container> have been created on remote SCL A contentInstance resource <contentInstance> has been created under the <container> resource. App has discovered the <app>, <container> and <contentInstance> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a containerRetrieveRequest (GET) for retrieving the attributes/meta-data and the opaque data of a <contentInstance> resource |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/applications/<app>/containers/<container>/contentInstances/<contentInstance> Host: localSCL Payload: empty |
| | 3 | Check (mld) | Forwarded GET request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/applications/<app>/containers/<container>/contentInstances/<contentInstance> Host: remoteSCL Payload: empty |
| | 4 | Verify | Remote indicates successful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: <contentInstance> resource |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 200 Payload: <contentInstance> resource |
| | 7 | Verify | App indicates successful operation |
| | 8 | | Repeat steps 1-7 for a contentInstance of a locationcontainer resource |
| | 9 | | Repeat steps 1-7 using "latest" instead of <contentInstance> to get the latest contentInstance |
| | 10 | | Repeat steps 1-7 using "oldest" instead of <contentInstance> to get the oldest contentInstance |

8.2.2.4 ContentInstance Content retrieve (partial addressing)

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|--|
| Identifier: | TD_M2M_MH_08 | | |
| Objective: | Handle contentInstanceRetrieveRequest with targetID using partial addressing (content attribute) | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.19.3 ETSI TS 102 690 [2], clause 9.3.2.15 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> Application <app> and associated container <container> have been created on remote SCL A contentInstance resource <contentInstance> has been created under the <container> resource App has discovered the <contentInstance> resource on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a containerRetrieveRequest (GET) for retrieving the content attribute of a <contentInstance> resource |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/applications/<app>/containers/<container>/contentInstances/<contentInstance>/content Host: localSCL Payload: empty |
| | 3 | Check (mld) | Sent GET request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/applications/<app>/containers/<container>/contentInstances/<contentInstance>/content Host: remoteSCL Payload: empty |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (mld) | remote SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: value of the content attribute |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 200 Payload: value of the content attribute |
| | 7 | Verify | App indicates successful operation |
| | 8 | | Repeat steps 1-7 to get a content of a contentInstance residing in locationcontainer resource |

8.2.2.5 Content Instance Delete

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_MH_09 | | |
| Objective: | App deletes contentInstance resource via a containerDeleteRequest on Remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.19.2 ETSI TS 102 690 [2], clause 9.3.2.15 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> Application <app> and associated container <container> have been created on remote SCL A contentInstance resource <contentInstance> has been created under the <container> resource App has discovered the <app>,<container> and <contentInstance> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a contentInstanceDeleteRequest (DELETE) |
| | 2 | Check (dla/mla) | Sent DELETE request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/containers/<container>/contentInstances/<contentInstance> Host: localSCL Payload: empty |

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| | 3 | Check (mld) | Forwarded DELETE request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/containers/<container>/contentInstances/<contentInstance> Host: remoteSCL Payload: empty |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 204 Payload: empty |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 204 Payload: empty |
| | 7 | Verify | App indicates successful operation |

8.2.3 Discovery Management on remote SCL

8.2.3.1 Discovery of all resources

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|--|
| Identifier: | TD_M2M_MH_10 | | |
| Objective: | App discovers resources residing in remote SCL via DiscoveryRetrieveRequest | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | void | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a DiscoveryRetrieveRequest in order to discover resources under resource /discovery located in remote SCL |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/discovery Host: localSCL Payload: empty |
| | 3 | Check (mld) | Forwarded GET request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/discovery Host: remoteSCL Payload: empty |
| | 4 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: Discovery resource including references to all resources residing in remote SCL |
| | 5 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 200 Payload: Discovery resource including references to all resources residing in remote SCL |
| | 6 | Verify | App indicates successful operation |

8.2.3.2 Discovery with Filter Criteria

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_MH_11 | | |
| Objective: | App discovers resources residing in remote SCL using specific Filter criteria via DiscoveryRetrieveRequest | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> Application <app> has been created on remote SCL with searchString=key1 | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a DiscoveryRetrieveRequest in order to discover resources under the resource /discovery located in remote SCL |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/discovery?searchString =key1 Host: localSCL Payload: empty |
| | 3 | Check (mld) | Forwarded GET request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/discovery?searchString =key1 Host: remoteSCL Payload: empty |
| | 4 | Check (dla/mla) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: Discovery resource including references to <app> |
| | 5 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 200 Payload: Discovery resource including references to <app> |
| | 6 | Verify | App indicates successful operation |

8.2.3.3 Discovery with max size

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|--|
| Identifier: | TD_M2M_MH_12 | | |
| Objective: | App discovers resources residing in remote SCL with a limited max size via DiscoveryRetrieveRequest | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | void | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a DiscoveryRetrieveRequest in order to discover resources under resource /discovery located in remote SCL |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/discovery?maxSize=2 Host: localSCL Payload: empty |
| | 3 | Check (mld) | Forwarded GET request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/discovery?maxSize=2 Host: remoteSCL Payload: empty |
| | 4 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: Trunked Discovery resource including only 2 resource references |

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|--|
| | 5 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 200 Payload: Trunked Discovery resource including only 2 resource references |
| | 6 | Verify | App indicates successful operation |

8.2.3.4 Discovery with searchPrefix

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_MH_13 | | |
| Objective: | App discovers resources residing in remote SCL limited search prefix via DiscoveryRetrieveRequest | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | void | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a DiscoveryRetrieveRequest in order to discover resources under a resource /discovery located in remote SCL |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI: <remoteSCL>/discovery?searchPrefix=<remoteSCL>/applications Host: localSCL Payload: empty |
| | 3 | Check (mld) | Forwarded GET request contains: <ul style="list-style-type: none"> Request URI: <remoteSCL>/discovery?searchPrefix=<remoteSCL>/applications Host: remoteSCL Payload: empty |
| | 4 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: Discovery resource including only resources under <remoteSCL>/applications |
| | 5 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 200 Payload: Discovery resource including only resources under <remoteSCL>/applications |
| | 6 | Verify | App indicates successful operation |

8.2.3.5 Discovery with multiple parameters

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_MH_14 | | |
| Objective: | App discovers resources residing in remote SCL using multiple parameters via DiscoveryRetrieveRequest | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an Application resource <app> on remote SCL with searchString=key1 and searchString=key2 | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a DiscoveryRetrieveRequest in order to discover resources under a well known resource /discovery located in remote SCL |
| | 2 | Check (dla/mla) | Sent GET request contains <ul style="list-style-type: none"> Request URI <sclBase>/discovery?searchString=key1 &searchString=key2&maxSize=1&searchPrefix=<sclBase>/applications Host: localSCL Payload: empty |
| | 3 | Check (md) | Sent GET request contains <ul style="list-style-type: none"> Request URI <sclBase>/discovery?searchString=key1 &searchString=key2&maxSize=1&searchPrefix=<sclBase>/applications Host: remoteSCL Payload: empty |
| | 4 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: Discovery resource including a reference to <app> |
| | 5 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 200 Payload: Discovery resource including a reference to <app> |
| | 6 | Verify | App indicates successful operation |

8.2.4 Subscription Management on remote SCL

8.2.4.1 Subscription Create

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_MH_15 | | |
| Objective: | App creates a subscription to application resource via subscriptionCreateRequest (POST) on remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> Application <app> and its associated container <container> have been created on remote SCL App has discovered the <app> and <container> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a subscriptionCreateRequest (POST) |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> Request URI: <RemoteSCL>/applications/<app>/containers/<container>/contentInstances/subscriptions Host: localSCL Payload: subscription <sub> resource to be created |
| | 3 | Check (mld) | Forwarded POST request contains: <ul style="list-style-type: none"> Request URI: <remoteSCL>/applications/<app>/containers/<container>/contentInstances/subscriptions Host: remoteSCL Payload: subscription <sub> resource to be created |

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| | 4 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> • Code = 201 • Content-Location: <remoteSCL>/applications/<app>/containers/<container>/contentInstances/subscriptions/<sub> • Payload: Created <sub> resource |
| | 5 | Verify | Remote SCL indicates successful operation |
| | 6 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> • Code = 201 • Content-Location: <remoteSCL>/applications/<app>/containers/<container>/contentInstances/subscriptions/<sub> • Payload: Created <sub> resource |
| | 7 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> • Code = 201 • Content-Location: <remoteSCL>/applications/<app>/containers/<container>/contentInstances/subscriptions/<sub> • Payload: Created <sub> resource |
| | 8 | Verify | App indicates successful operation |

8.2.4.2 Subscription Retrieve

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|--|
| Identifier: | TD_M2M_MH_16 | | |
| Objective: | App retrieves information about a subscription via subscriptionRetrieveRequest (GET), such as expirationTime, filterCriteria, contactURI, noRepresentation, timeoutReason, etc. on remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> • Application <app> and associated container <container> have been created on remote SCL • A subscription resource <sub> has been created under the <container> resource • App has discovered the <app>, <container> and <sub> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a subscriptionRetrieveRequest (GET) for retrieving information about a subscription <sub> on remote SCL |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> • Request URI: <remoteSCL>/applications/<app>/containers/<container>/contentInstances/subscriptions/<sub> • Host: localSCL • Payload: empty |
| | 3 | Check (mld) | Forwarded GET request contains: <ul style="list-style-type: none"> • Request URI: <remoteSCL>/applications/<app>/containers/<container>/contentInstances/subscriptions/<sub> • Host: remoteSCL • Payload: empty |
| | 4 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> • Code = 200 • Payload: <sub> resource |
| | 5 | Check (dla/mla) | Local SCL sends response containing: <ul style="list-style-type: none"> • Code = 200 • Payload: <sub> resource |
| | 6 | Verify | App indicates successful operation |

8.2.4.3 Subscription Update

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|--|
| Identifier: | TD_M2M_MH_17 | | |
| Objective: | App updates information about a subscription via subscriptionUpdateRequest on remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> • Application <app> and associated container <container> have been created on remote SCL • A subscription resource <sub> has been created under the <container> resource • App has discovered the <app>, <container> and <sub> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a subscriptionUpdateRequest (PUT) to update the lifetime of the resource on remote SCL |
| | 2 | Check (dla/mla) | Sent PUT request contains: <ul style="list-style-type: none"> • Request URI: <remoteSCL>/applications/<app>/containers/<container>/contentInstances/subscriptions/<sub> • Host: localSCL • Payload: Modified <sub> resource |
| | 3 | Check (mld) | Forwarded PUT request contains: <ul style="list-style-type: none"> • Request URI: <remoteSCL>/applications/<app>/containers/<container>/contentInstances/subscriptions/<sub> • Host: remoteSCL • Payload: Modified <sub> resource |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> • Code = 200 • Payload: Modified <sub> resource |
| | 6 | Check (dla/mla) | Local SCL sends response containing: <ul style="list-style-type: none"> • Code = 200 • Payload: Modified <sub> resource |
| | 7 | Verify | App indicates successful operation |

8.2.4.4 Subscription Delete

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|--|
| Identifier: | TD_M2M_MH_18 | | |
| Objective: | App cancels subscription via an subscriptionDeleteRequest on remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> Application <app> and associated container <container> have been created on remote SCL A subscription resource <sub> has been created under the <container> resource App has discovered the <app>, <container> and <sub> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a subscriptionDeleteRequest |
| | 2 | Check (dla/mla) | Sent DELETE request contains <ul style="list-style-type: none"> Request URI: <remoteSCL>/applications/<app>/containers/<container>/contentInstances/subscriptions/<sub> Host: localSCL Payload: Empty |
| | 3 | Check (dla/mla) | Forwarded DELETE request contains <ul style="list-style-type: none"> Request URI: <remoteSCL>/applications/<app>/containers/<container>/contentInstances/subscriptions/<sub> Host: remoteSCL Payload: Empty |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 204 Payload: Empty |
| | 6 | Check (dla/mla) | Local SCL sends response containing: <ul style="list-style-type: none"> Code = 204 Payload: Empty |
| | 7 | Verify | App indicates successful operation |

8.2.4.5 Subscription Notify (To server capable application)

| Interoperability Test Description | | | |
|-----------------------------------|---|-------------|---|
| Identifier: | TD_M2M_MH_19 | | |
| Objective: | GSCL sends notification(s) via subscriptionNotifyRequest on NSCL | | |
| Configuration: | M2M_CFG_06, M2M_CFG_11 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> DA/GA has created an Application resource <app> with its associated container <container> on GSCL NA shall be server capable NA has created subscription <sub> to <container> contentInstances resource on GSCL using a "contactURI" A listener is listening on "contactURI" to check the notify | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | DA/GA is requested to send a contentInstanceCreateRequest (POST) |
| | 2 | Check (dla) | Sent POST request contains: <ul style="list-style-type: none"> URI: <gscl>/applications/<app>/containers/<container>/contentInstances Payload: <contentInstance> resource Host: GSCL |
| | 3 | Verify | GSCL indicates successful operation |
| | 4 | Check (dla) | <ul style="list-style-type: none"> GSCL sends response containing: Code = 201 Payload: <contentInstance> resource |
| | 5 | Verify | GSCL sends subscriptionNotifyRequest (POST) to NSCL |
| | 6 | Check (mld) | Sent POST request to NSCL contains <ul style="list-style-type: none"> URI: contactURI Payload: <Notify> resource Host: NSCL |
| | 7 | Check (mld) | Forwarded POST request to NA listening server contains <ul style="list-style-type: none"> URI: contactURI Payload: <Notify> resource Host: NA listening server |
| | 8 | Check (mla) | NA listening server sent response contains: <ul style="list-style-type: none"> Code = 204 Payload: empty |
| | 9 | Verify | NA indicates successful operation |
| | 10 | Check (mld) | NSCL forwards response to GSCL containing: <ul style="list-style-type: none"> Code = 204 Payload: empty |
| | 11 | Verify | GSCL indicates successful operation |

| Interoperability Test Description | | | |
|-----------------------------------|--|-------------|---|
| Identifier: | TD_M2M_MH_20 | | |
| Objective: | NSCL sends notification(s) via subscriptionNotifyRequest on GSCL | | |
| Configuration: | M2M_CFG_06, M2M_CFG_11 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> • NA has created an Application resource <app> with its associated container <container> on NSCL • DA/GA shall be server capable • DA/GA has created subscription <sub> to <container> contentInstances resource on NSCL using a "contactURI" • A listener is listening on "contactURI" to check the notify | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | NA is requested to send a contentInstanceCreateRequest (POST) |
| | 2 | Check (mla) | Sent POST request contains: <ul style="list-style-type: none"> • URI: <nscl>/applications/<app>/containers/<container>/contentInstances • Payload: <contentInstance> resource • Host: NSCL |
| | 3 | Verify | NSCL indicates successful operation |
| | 4 | Check (mla) | <ul style="list-style-type: none"> • NSCL sends response containing: • Code = 201 • Payload: <contentInstance> resource |
| | 5 | Verify | NSCL sends subscriptionNotifyRequest (POST) to GSCL |
| | 6 | Check (mld) | Sent POST request to GSCL contains: <ul style="list-style-type: none"> • URI: contactURI • Payload: <Notify> resource • Host: GSCL |
| | 7 | Check (mld) | Forwarded POST request to DA/GA listening server contains: <ul style="list-style-type: none"> • URI: contactURI • Payload: <Notify> resource • Host: DA/GA listening server |
| | 8 | Check (dla) | DA/GA listening server sent response contains: <ul style="list-style-type: none"> • Code = 204 • Payload: empty |
| | 9 | Verify | DA/GA indicates successful operation |
| | 10 | Check (mld) | GSCL forwards response to NSCL containing: <ul style="list-style-type: none"> • Code = 204 • Payload: empty |
| | 11 | Verify | NSCL indicates successful operation |

8.2.4.6 Subscription Notify (To application container)

| Interoperability Test Description | | | |
|-----------------------------------|--|-------------|---|
| Identifier: | TD_M2M_MH_21 | | |
| Objective: | SCL sends notification(s) via subscriptionNotifyRequest | | |
| Configuration: | M2M_CFG_06, M2M_CFG_11 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> DA/GA has created an Application resource <app1> with its associated container <container1> on GSCL NA has created an Application resource <app2> with its associated <container2> on NSCL NA has created a subscription <sub> to <container1> contentInstances resource on GSCL using: <nscl>/applications/<app2>/containers/<container2> as "contactURI" | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | DA/GA is requested to send a contentInstanceCreateRequest (POST) |
| | 2 | Check (dla) | Sent POST request contains <ul style="list-style-type: none"> URI:<gscl>/applications/<app1>/containers/<container1>/contentInstances Payload: <contetnInstance> resource Host: GSCL |
| | 3 | Check (dla) | GSCL sends response containing: <ul style="list-style-type: none"> Code = 201 Location:<gscl>/applications/<app1>/containers/<container1>/contentInstances/<contetnInstance> Payload: created <contetnInstance> resource |
| | 4 | Verify | DA/GA indicates successful operation |
| | 5 | Verify | GSCL sends subscriptionNotifyRequest (POST) |
| | 6 | Check (mld) | Sent POST request contains <ul style="list-style-type: none"> Request URI: <nscl>/applications/<app2>/containers/<container2>/contentInstances Host: NSCL Payload: <notify> resource containing the <contentInstance> resource |
| | 7 | Verify | NSCL sends subscriptionNotifyResponse to GSCL |
| | 8 | Check (mla) | NSCL sends response containing: <ul style="list-style-type: none"> Code = 204 Payload: empty |
| | 9 | Verify | NSCL indicates successful operation |

| Interoperability Test Description | | | |
|-----------------------------------|---|-------------|--|
| Identifier: | TD_M2M_MH_22 | | |
| Objective: | SCL sends notification(s) via subscriptionNotifyRequest | | |
| Configuration: | M2M_CFG_06, M2M_CFG_11 | | |
| References: | ETSI TS 102 921 [1], clause 10.25.2 ETSI TS 102 690 [2], clause 9.3.2.19 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> • NA has created an Application resource <app1> with its associated container <container1> on NSCL • DA/GA has created an Application resource <app2> with its associated <container2> on GSCL • DA/GA has created a subscription <sub> to <container1> contentInstances resource on NSCL using: <nscl>/applications/<app2>/containers/<container2> as "contactURI" | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | NA is requested to send a contentInstanceCreateRequest (POST) |
| | 2 | Check (mla) | Sent POST request contains: <ul style="list-style-type: none"> • URI:<nscl>/applications/<app1>/containers/<container1>/contentInstances • Payload: <contetnInstance> resource • Host: NSCL |
| | 3 | Check (mla) | NSCL sends response containing: <ul style="list-style-type: none"> • Code = 201 • Location:<nscl>/applications/<app1>/containers/<container1>/contentInstances/<contetnInstance> • Payload: created <contetnInstance> resource |
| | 4 | Verify | NA indicates successful operation |
| | 5 | Verify | NSCL sends subscriptionNotifyRequest (POST) |
| | 6 | Check (dla) | Sent POST request contains: <ul style="list-style-type: none"> • Request URI: <gscl>/applications/<app2>/containers/<container2>/contentInstances • Host: GSCL • Payload: <notify> resource containing the <contentInstance> resource |
| | 7 | Verify | GSCL sends subscriptionNotifyResponse to NSCL |
| | 8 | Check (mla) | GSCL sends response containing: <ul style="list-style-type: none"> • Code = 204 • Payload: empty |
| | 9 | Verify | GSCL indicates successful operation |

8.2.5 Notification Channel Management

8.2.5.1 NotificationChannel Create

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|--|
| Identifier: | TD_M2M_MH_23 | | |
| Objective: | App creates a notificationChannel to application resource on remote SCL via notificationChannelCreateRequest (POST) | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an application resource <app> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a notificationChannelCreateRequest (POST) |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> Request URI: <sclBase>/applications/<app>/notificationChannels Host: localSCL Payload: notificationChannel <nc> resource to be created |
| | 3 | Check (mld) | Forwarded POST request contains: <ul style="list-style-type: none"> Request URI: <remoteSCL>/applications/<app>/notificationChannels Host: remoteSCL Payload: notificationChannel <nc> resource to be created |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 201 Content-Location: <remoteSCL>/applications/<app>/notificationChannels/<nc> Payload: NotificationChannel <nc> resource |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 201 Content-Location: <remoteSCL>/applications/<app>/notificationChannels/<nc> Payload: NotificationChannel <nc> resource |
| | 7 | Verify | App indicates successful operation |

8.2.5.2 NotificationChannel Retrieve

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|--|
| Identifier: | TD_M2M_MH_24 | | |
| Objective: | App retrieves information about a notificationChannel on remote SCL via notificationChannelRetrieveRequest (GET). | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created a notificationChannel resource <nc> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a notificationChannelRetrieveRequest (GET) for retrieving information about a notificationChannel <nc> |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI: <remoteSCL>/applications/<app>/notificationChannels/<nc> Host: localSCL Payload: empty |
| | 3 | Check (mld) | Forwarded GET request contains: <ul style="list-style-type: none"> Request URI: <remoteSCL>/applications/<app>/notificationChannels/<nc> Host: remoteSCL Payload: empty |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: notificationChannel <nc> resource |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 200 Payload: notificationChannel <nc> resource |
| | 7 | Verify | App indicates successful operation |

8.2.5.3 NotificationChannel Delete

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_MH_25 | | |
| Objective: | App deletes a notificationChannel on remote SCL via a notificationChannelDeleteRequest | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created a notificationChannel resource <nc> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a notificationChannelDeleteRequest |
| | 2 | Check (dla/mla) | Sent DELETE request contains: <ul style="list-style-type: none"> Request URI: <remoteSCL>/applications/<app>/notificationChannels/<nc> Host: localSCL Payload: Empty |
| | 3 | Check (mld) | Forwarded DELETE request contains: <ul style="list-style-type: none"> Request URI: <remoteSCL>/applications/<app>/notificationChannels/<nc> Host: remoteSCL Payload: Empty |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 204 Payload: Empty |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 204 Payload: Empty |
| | 7 | Verify | App indicates successful operation |

8.2.5.4 Long polling based notifications

| Interoperability Test Description | | |
|-----------------------------------|--|--|
| Identifier: | TD_M2M_MH_26 | |
| Objective: | NA receives notifications via a notificationChannelRetrieveRequest (GET) using long polling | |
| Configuration: | M2M_CFG_06, M2M_CFG_11 | |
| References: | | |
| Pre-test conditions: | <ul style="list-style-type: none"> DA/GA has created an application resource <app1> with its associated container <container1> on GSCL NA has created an application resource <app2> on NSCL NA has created a notificationChannel resource <nc> to <app2> and obtained a "ContactURI" and a "LongPollingURI" (element in the channelData attribute) NA has sent a retrieve request to the provided "LongPollingURI" NA has subscribed to <container1> contentInstances resource using the provided "ContactURI" | |
| Test Sequence: | Step | Description |
| | 1 | Stimulus DA/GA is requested to send a contentInstanceCreateRequest (POST) to create content instance on its corresponding <container1>. |
| | 2 | Check (dla) Sent POST request contains: <ul style="list-style-type: none"> URI:<gscl>/applications/<app1>/containers/<container1>/contentInstances Payload: <contentInstance> resource Host: GSCL |
| | 3 | Check (dla) GSCL sends response containing: <ul style="list-style-type: none"> Code = 201 Location:<gscl>/applications/<app1>/containers/<container1>/contentInstances/<contentInstance> Payload: created <contentInstance> resource |
| | 4 | Verify DA/GA indicates successful operation |
| | 5 | Verify GSCL sends subscriptionNotifyRequest (POST) to NSCL |
| | 6 | Check (mld) Sent POST request contains: <ul style="list-style-type: none"> Request URI: Host: NSCL Payload: <notify> resource containing the <contentInstance> resource |
| | 7 | Verify NSCL correlates the "contactURI" to the notificationChannel <nc> and finds a long polling request active on "longPollingURI" related to NA NSCL sends a notificationChannelRetrieveResponse to NA |
| | 8 | Check (mld) NSCL sends response to GSCL containing: <ul style="list-style-type: none"> Code = 204 Payload: empty |
| | 9 | Verify GSCL indicates successful operation |
| | 10 | Verify NA indicates a successful operation NA sends a new notificationChannelRetrieveResponse to the "LongPollingURI" and waits for the next event |

| Interoperability Test Description | | | |
|-----------------------------------|---|-------------|--|
| Identifier: | TD_M2M_MH_27 | | |
| Objective: | DA/GA receives notifications via a notificationChannelRetrieveRequest (GET) using long polling. | | |
| Configuration: | M2M_CFG_06, M2M_CFG_11 | | |
| References: | | | |
| Pre-test conditions: | <ul style="list-style-type: none"> • NA has created an application resource <app1> with its associated container <container1> on NSCL • DA/GA has created an application resource <app2> on GSCL • DA/GA has created a notificationChannel resource <nc> to <app2> and obtained a "ContactURI" and a "LongPollingURI" (element in the channelData attribute) • DA/GA has sent a retrieve request to the provided "LongPollingURI" • DA/GA has subscribed to <container1> contentInstances resource using the provided "ContactURI" | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | NA is requested to send a contentInstanceCreateRequest (POST) to create content instance on its corresponding <container1>. |
| | 2 | Check (mla) | Sent POST request contains: <ul style="list-style-type: none"> • URI: <nscl>/applications/<app1>/containers/<container1>/contentInstances • Payload: <contentInstance> resource • Host: NSCL |
| | 3 | Check (mla) | NSCL sends response containing: <ul style="list-style-type: none"> • Code = 201 • Location: <nscl>/applications/<app1>/containers/<container1>/contentInstances/<contentInstance> • Payload: created <contentInstance> resource |
| | 4 | Verify | NA indicates successful operation |
| | 5 | Verify | NSCL sends subscriptionNotifyRequest (POST) to GSCL |
| | 6 | Check (mld) | Sent POST request contains: <ul style="list-style-type: none"> • Request URI: • Host: GSCL • Payload: <notify> resource containing the <contentInstance> resource |
| | 7 | Verify | GSCL correlates the "contactURI" to the notificationChannel <nc> and finds a long polling request active on "longPollingURI" related to NA GSCL sends a notificationChannelRetrieveResponse to DA/GA |
| | 8 | Check (mld) | GSCL sends response to NSCL containing: <ul style="list-style-type: none"> • Code = 204 • Payload: empty |
| | 9 | Verify | NSCL indicates successful operation |
| | 10 | Verify | DA/GA indicates a successful operation DA/GA sends a new notificationChannelRetrieveResponse to the "LongPollingURI" and waits for the next event |

8.2.6 AccessRight Management on remote SCL

8.2.6.1 AccessRight Resource creation

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|--|
| Identifier: | TD_M2M_MH_28 | | |
| Objective: | App creates an AccessRight resource via an accessRightCreateRequest on remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.11.2 ETSI TS 102 690 [2], clause 9.3.2.10 | | |
| Pre-test conditions: | void | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a accessRightCreateRequest (POST) |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> Request method = POST Request URI <remoteSCL>/accessRights Host: localSCL Payload: application resource <accessRight> to be created |
| | 3 | Check (mld) | Forwarded POST request contains: <ul style="list-style-type: none"> Request method = POST Request URI <remoteSCL>/accessRights Host: remoteSCL Payload: application resource <accessRight> to be created |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Status Code = 201 Content-Location: <remoteSCL>/accessRights/<accessRight> Payload: created <accessRight> resource |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Status Code = 201 Content-Location: <remoteSCL>/accessRights/<accessRight> Payload: created <accessRight> resource |
| | 7 | Verify | App indicates successful operation |

8.2.6.2 AccessRight Retrieve

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_MH_29 | | |
| Objective: | App retrieves accessRight resource via an accessRightRetrieveRequest (GET) on remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.11.3 ETSI TS 102 690 [2], clause 9.3.2.10 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an accessRight resource <accessRight> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a accessRightRetrieveRequest (GET) |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request method = GET Request URI <remoteSCL>/accessRights/<accessRight> Host: localSCL Payload: empty |
| | 3 | Check (mld) | Forwarded GET request contains: <ul style="list-style-type: none"> Request method = GET Request URI <remoteSCL>/accessRights/<accessRight> Host: remoteSCL Payload: empty |
| | 4 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Status Code =200 Payload: <app> resource |
| | 5 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Status Code =200 Payload: <app> resource |
| | 6 | Verify | App indicates successful operation |

8.2.6.3 AccessRight Update

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_MH_30 | | |
| Objective: | App updates attribute in accessRight resource via an accessRightUpdateRequest (PUT) on remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.11.4 ETSI TS 102 690 [2], clause 9.3.2.10 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an accessRight resource <accessRight> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a accessRightUpdateRequest (PUT) |
| | 2 | Check (dla/mla) | Sent PUT request contains: <ul style="list-style-type: none"> Request method = PUT Request URI <remoteSCL>/accessRights/<accessRight> Host: localSCL Payload: modified accessRight resource |

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| | 3 | Check (mld) | Forwarded PUT request contains: <ul style="list-style-type: none"> Request method = PUT Request URI <remoteSCL>/accessRights/<accessRight> Host: remoteSCL Payload: modified accessRight resource |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: updated <accessRight> resource |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 200 Payload: updated <accessRight> resource |
| | 7 | Verify | App indicates successful operation |

8.2.6.4 AccessRight Delete

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_MH_31 | | |
| Objective: | App de-registers by deleting accessRightresource via an accessRightDeleteRequest on remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.11.5 ETSI TS 102 690 [2], clause 9.3.2.10 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an accessRight resource <accessRight> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a accessRightDeleteRequest (DELETE) |
| | 2 | Check (dla/mla) | Sent DELETE request contains Request method DELETE <ul style="list-style-type: none"> Request URI <remoteSCL>/accessRights/<accessRight> Host: localSCL Payload: empty |
| | 3 | Check (mld) | Forwarded DELETE request contains Request method DELETE <ul style="list-style-type: none"> Request URI <remoteSCL>/accessRights/<accessRight> Host: remoteSCL Payload: empty |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Status Code = 204 Payload: empty |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Status Code = 204 Payload: empty |
| | 7 | Verify | App indicates successful operation |

8.2.6.5 Unauthorized operation (Empty Requesting Entity)

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|--|
| Identifier: | TD_M2M_MH_32 | | |
| Objective: | App retrieve request is rejected due to Access Rights on remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.11.1 ETSI TS 102 690 [2], clause 9.3.2.10 | | |
| Pre-test conditions: | void | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an sclBaseRetrieveRequest (GET) for resource <sclBase> with an empty on remote SCL requestingEntity. |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI <sclBase> Host: localSCL Payload: empty |
| | 3 | Check (mld) | Forwarded GET request contains: <ul style="list-style-type: none"> Request URI <sclBase> Host :remoteSCL Payload: empty |
| | 4 | Verify | Remote SCL indicates unsuccessful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 401 (unauthorized operation) Payload: ErrorInfo resource |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 401 (unauthorized operation) Payload: ErrorInfo resource |
| | 7 | Verify | App indicates unsuccessful operation |

8.2.6.6 Unauthorized operation (Bad Requesting Entity)

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|--|
| Identifier: | TD_M2M_MH_33 | | |
| Objective: | App retrieve request is rejected due to Access Rights on remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.11.1 ETSI TS 102 690 [2], clause 9.3.2.10 | | |
| Pre-test conditions: | void | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an sclBaseRetrieveRequest (GET) on remote SCL for resource <sclBase> with a bad requestingEntity. |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request URI <sclBase> Host: localSCL Payload: empty |
| | 3 | Check (mld) | Forwarded GET request contains: <ul style="list-style-type: none"> Request URI <sclBase> Host: remoteSCL Payload: empty |
| | 4 | Verify | Remote SCL indicates unsuccessful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 401 (unauthorized operation) Payload: ErrorInfo resource |

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|--|
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 401 (unauthorized operation) Payload: ErrorInfo resource |
| | 7 | Verify | App indicates unsuccessful operation |

8.2.6.7 Unauthorized operation (Insufficient Access Rights)

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_MH_34 | | |
| Objective: | App delete request is rejected due to Access Rights on remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.11.1 ETSI TS 102 690 [2], clause 9.3.2.10 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> Application <app> has been created on remote SCL An access Right <ar1> has been created on <app>, which forbids to delete container A container resource <container> has been created in application <app>, using the access right <ar1> | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a containerDeleteRequest (DELETE) for resource <container> on remote SCL |
| | 2 | Check (dla/mla) | Sent DELETE request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/applications/<app>/containers/<container> Host: remoteSCL Payload: empty |
| | 3 | Check (mld) | Forwarded DELETE request contains: <ul style="list-style-type: none"> Request URI <remoteSCL>/applications/<app>/containers/<container> Host: remoteSCL Payload: empty |
| | 4 | Verify | Remote SCL indicates unsuccessful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 401 (unauthorized operation) Payload: ErrorInfo resource |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 401 (unauthorized operation) Payload: ErrorInfo resource |
| | 7 | Verify | App indicates unsuccessful operation |

8.2.7 Group Management on remote SCL

8.2.7.1 Group Resource creation

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_MH_35 | | |
| Objective: | App creates a group resource via a groupCreateRequest on remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.21.2 ETSI TS 102 690 [2], clause 9.3.2.17 | | |
| Pre-test conditions: | void | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a groupCreateRequest (POST) on remote SCL |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> Request method = POST Request URI <remoteSCL>/groups Host: localSCL Payload: Group resource <group> to be created |
| | 3 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> Request method = POST Request URI <remoteSCL>/groups Host: remoteSCL Payload: Group resource <group> to be created |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Status Code = 201 Content-Location: <remoteSCL>groups/<group> Payload: created <group> resource |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Status Code = 201 Content-Location: <remoteSCL>groups/<group> Payload: created <group> resource |
| | 7 | Verify | App indicates successful operation |

8.2.7.2 Group Retrieve

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_MH_36 | | |
| Objective: | App retrieves group resource via a groupRetrieveRequest (GET) on remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.21.3 ETSI TS 102 690 [2], clause 9.3.2.17 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created a Group resource <group> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a groupRetrieveRequest (GET) |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> Request method = GET Request URI <remoteSCL>/groups/<group> Host: localSCL Payload: empty |
| | 3 | Check (mld) | Forwarded GET request contains: <ul style="list-style-type: none"> Request method = GET Request URI <remoteSCL>/groups/<group> Host: remoteSCL Payload: empty |
| | 4 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Status Code =200 Payload: <group> resource |
| | 5 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Status Code =200 Payload: <group> resource |
| | 6 | Verify | App indicates successful operation |

8.2.7.3 Group Update

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_MH_37 | | |
| Objective: | App updates attribute in group resource via an groupUpdateRequest (PUT) on remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.21.4 ETSI TS 102 690 [2], clause 9.3.2.17 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created a group resource <group> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a groupUpdateRequest (PUT) |
| | 2 | Check (dla/mla) | Sent PUT request contains: <ul style="list-style-type: none"> Request method = PUT Request URI <remoteSCL>/groups/<group> Host: localSCL Payload: modified group resource |
| | 3 | Check (mld) | Forwarded PUT request contains: <ul style="list-style-type: none"> Request method = PUT Request URI <remoteSCL>/groups/<group> Host: remoteSCL Payload: modified group resource |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Code = 200 Payload: updated <group> resource |

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Code = 200 Payload: updated <group> resource |
| | 7 | Verify | App indicates successful operation |

8.2.7.4 Group Delete

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_MH_38 | | |
| Objective: | App delete group resource via an groupDeleteRequest (DELETE) on remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.21.5 ETSI TS 102 690 [2], clause 9.3.2.17 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> App has created an group resource <group> on remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a groupDeleteRequest (DELETE) |
| | 2 | Check (dla/mla) | Sent DELETE request contains: <ul style="list-style-type: none"> Request method = DELETE Request URI <remoteSCL>/groups/<group> Host: localSCL Payload: empty |
| | 3 | Check (mld) | Forwarded DELETE request contains: <ul style="list-style-type: none"> Request method = DELETE Request URI <remoteSCL>/groups/<group> Host: remoteSCL Payload: empty |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> Status Code = 204 Payload: empty |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> Status Code = 204 Payload: empty |
| | 7 | Verify | App indicates successful operation |

8.2.7.5 Group Operations

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|--|
| Identifier: | TD_M2M_MH_39 | | |
| Objective: | App creates multiple contentInstance using group resource on Remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.21.2 ETSI TS 102 690 [2], clause 9.3.2.17 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> • App has created an application <app1> resource on remote SCL • App has created an application <cont1> resource on <app1> • App has created an application <app2> resource on remote SCL • App has created an application <cont2> resource on <app2> • App has created a group resource <groupPOST> on remote SCL using the provided representation in ref. (the groupPOST representation should include app1contentInstances and app2 contentInstances as members) | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a membersContentCreateRequest (POST) |
| | 2 | Check (dla/mla) | Sent POST request contains <ul style="list-style-type: none"> • Request method = POST • Request URI <remoteSCL>/groups/<groupPOST>/membersContent • Host: localSCL • Payload: ContentInstance resource <contentInstance> to be created |
| | 3 | Check (mld) | Forwarded POST request contains <ul style="list-style-type: none"> • Request method = POST • Request URI <remoteSCL>/groups/<groupPOST>/membersContent • Host: remoteSCL • Payload: ContentInstance resource <contentInstance> to be created |
| | 4 | Verify | Remote SCL indicates successful operation |
| | 5 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> • Status Code = 201 • Content-Location: <remoteSCL>groups/<groupPOST> • Payload: membersContent resource |
| | 6 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> • Status Code = 201 • Content-Location: <remoteSCL>groups/<groupPOST> • Payload: membersContent resource |
| | 7 | Verify | App indicates successful operation Verify that <contentInstance> is created on <app1> and <app2> |

| Interoperability Test Description | | | |
|-----------------------------------|--|-----------------|---|
| Identifier: | TD_M2M_MH_40 | | |
| Objective: | App retrieves multiple contentInstance using group resource on remote SCL | | |
| Configuration: | M2M_CFG_04, M2M_CFG_04, M2M_CFG_08, M2M_CFG_10 | | |
| References: | ETSI TS 102 921 [1], clause 10.21.2 ETSI TS 102 690 [2], clause 9.3.2.17 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> • App has created an application <app1> resource on remote SCL • App has created an application <cont1> resource on <app1> • App has created an application <app2> resource on remote SCL • App has created an application <cont2> resource on <app2> • App has created a group resource <groupGET> on remote SCL using the provided representation in ref. (the groupGET representation should include app1contentInstances and app2 contentInstances as members) | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send a membersContentRetrieveRequest (GET) |
| | 2 | Check (dla/mla) | Sent GET request contains: <ul style="list-style-type: none"> • Request method = GET • Request URI <remoteSCL>/groups/<groupGET>/membersContent • Host: localSCL • Payload: empty |
| | 3 | Check (mld) | Forwarded GET request contains: <ul style="list-style-type: none"> • Request method = GET • Request URI <remoteSCL>/groups/<groupGET>/membersContent • Host: remoteSCL • Payload: empty |
| | 4 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> • Status Code = 200 • Payload: memberContents resource |
| | 5 | Check (dla/mla) | Local SCL forwards response containing: <ul style="list-style-type: none"> • Status Code = 200 • Payload: memberContents resource |
| | 6 | Verify | App indicates successful operation Verify that App received <app1> and <app2> contentInstances representations |

8.2.8 Announcement

8.2.8.1 Application registration with announcement

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|--|
| Identifier: | TD_M2M_MH_41 | | |
| Objective: | App registration with Announcement | | |
| Configuration: | M2M_CFG_06, M2M_CFG_11 | | |
| References: | ETSI TS 102 921 [1], clause 10.9.2 ETSI TS 102 690 [2], clause 9.3.2.28 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> • GSCL has registered to NSCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an applicationCreateRequest with announceTo attribute activated (TRUE) and Link attribute pointing remote SCL |
| | 2 | Check (dla/mla) | Sent POST request contains: <ul style="list-style-type: none"> • Request URI <localSCL>/applications • Payload: application resource <app> to be created • Host: localSCL |
| | 3 | Check (dla/mla) | Local SCL sends response containing: <ul style="list-style-type: none"> • Status Code = 201 • Content-Location: <localSCL>/applications/<app> • Payload: created <app> resource |
| | 4 | Verify | App indicates successful operation |
| | 5 | Verify (mld) | Local SCL sends applicationAnncCreateRequest (POST) to remote SCL |
| | 6 | Check (mld) | Sent POST request contains: <ul style="list-style-type: none"> • Request URI <remoteSCL>/scls/<localSCL>/applications • Payload: applicationAnnc resource <appAnnc> to be created • Host = NSCL |
| | 7 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> • Status Code = 201 • Content-Location: <remoteSCL>/scls/<localSCL>/applications/<appAnnc> • Payload: created <appAnnc> resource |
| | 8 | Verify | Remote SCL indicates announced resource <appAnnc>Annc |

8.2.8.2 Application delete with announcement

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|---|
| Identifier: | TD_M2M_MH_42 | | |
| Objective: | App application delete with Announcement | | |
| Configuration: | M2M_CFG_06, M2M_CFG_11 | | |
| References: | ETSI TS 102 921 [1], clause 10.9.2 ETSI TS 102 690 [2], clause 9.3.2.28 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> • GSCL has registered to NSCL • App has created an announceable Application resource <app> on local SCL • Local SCL has announced <appAnnc> to remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an applicationDeleteRequest (DELETE) |
| | 2 | Check (dla/mla) | <ul style="list-style-type: none"> • Request URI <localSCL>/applications/<app> • Host :localSCL • Payload: empty |
| | 3 | Check (dla/mla) | GSCL sends response containing: <ul style="list-style-type: none"> • Status Code = 204 • Payload: empty |
| | 4 | Verify | App indicates successful operation |
| | 5 | Verify | Local SCL sends applicationAnncDeleteRequest (DELETE) to remote SCL |
| | 6 | Check (mld) | Sent DELETE request contains: <ul style="list-style-type: none"> • Request URI <remoteSCL>/applications/<appAnnc> • Host :remoteSCL • Payload: empty |
| | 7 | Check (mld) | remoteSCL sends response containing: <ul style="list-style-type: none"> • Status Code = 204 • Payload: empty |
| | 8 | Verify | remoteSCL indicates announced resource <appAnnc> is deleted |

8.2.8.3 Application De-Announce Ressources

| Interoperability Test Description | | | |
|-----------------------------------|---|-----------------|--|
| Identifier: | TD_M2M_MH_43 | | |
| Objective: | App application De-Announce ressource | | |
| Configuration: | M2M_CFG_06, M2M_CFG_11 | | |
| References: | ETSI TS 102 921 [1], clause 10.9.2 ETSI TS 102 690 [2], clause 9.3.2.28 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> • GSCL has registered to NSCL • App has created an announceable Application resource <app> on local SCL • Local SCL has announced <appAnnc> to remote SCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | App is requested to send an applicationUpdateRequest (PUT) with announceTo option deactivated (False) |
| | 2 | Check (dla/mla) | Sent PUT request contains: <ul style="list-style-type: none"> • Request method = PUT • Request URI <localSCL>/applications/<app> • Host :localSCL • Payload: modified application resource |
| | 3 | Check (dla/mla) | Local SCL sends response containing: <ul style="list-style-type: none"> • Status Code = 200 • Payload: updated <app> resource |
| | 4 | Verify | App indicates successful operation |
| | 5 | Verify | Local SCL sends applicationAnncDeleteRequest (DELETE) to remote SCL |
| | 6 | Check (mld) | Sent DELETE request contains: <ul style="list-style-type: none"> • Request URI <remoteSCL>/applications/<appAnnc> • Host :remoteSCL • Payload: empty |
| | 7 | Check (mld) | Remote SCL sends response containing: <ul style="list-style-type: none"> • Status Code = 204 • Payload: empty |
| | 8 | Verify | Remote SCL indicates announced resource <appAnnc> is deleted |

8.3 End to End configuration testing

8.3.1 Resource management with re-targeting

| Interoperability Test Description | | | |
|-----------------------------------|--|-------------|--|
| Identifier: | TD_M2M_E2E_01 | | |
| Objective: | DA/GA adds a contentInstance resource < contentInstance> to the contentInstances resource of a specific container in remote NSCL via a contentInstanceCreateRequest | | |
| Configuration: | M2M_CFG_06, M2M_CFG_11 | | |
| References: | ETSI TS 102 921 [1], clause 10.19.2 ETSI TS 102 690 [2], clause 9.3.2.15 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> • NA is registered on NSCL • DA/GA has created an Application resource <app> on GSCL • DA/GA has created a container resource <container> in <app> on GSCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | NA is requested to send a contentInstanceCreateRequest (POST) |
| | 2 | Check (mla) | Sent POST request contains: <ul style="list-style-type: none"> • Request URI <gscl>/applications/<app>/containers/<container>/contentInstances • Host :NSCL • Payload: ContentInstance resource <contentInstance> to be created |
| | 3 | Check (mld) | Sent POST request contains: <ul style="list-style-type: none"> • Request URI <gscl>/applications/<app>/containers/<container>/contentInstances • Host :GSCL • Payload: ContentInstance resource <contentInstance> to be created |
| | 4 | Check (mld) | GSCL sends response containing: <ul style="list-style-type: none"> • Code = 201 • Content-Location: <gscl>/applications/<app>/containers/<container>/contentInstances/<contentInstance> • Payload: <contentInstance> resource |
| | 5 | Verify | NSCL indicates successful operation |
| | 6 | Check (mla) | NSCL sends response containing: <ul style="list-style-type: none"> • Code = 201 • Content-Location: <gscl>/applications/<app>/containers/<container>/contentInstances/<contentInstance> • Payload: <contentInstance> resource |
| | 7 | Verify | NA indicates successful operation |

| Interoperability Test Description | | | |
|-----------------------------------|--|-------------|--|
| Identifier: | TD_M2M_E2E_02 | | |
| Objective: | NA adds a contentInstance resource <contentInstance> to the contentInstances resource of a specific container in remote GSCL via a contentInstanceCreateRequest | | |
| Configuration: | M2M_CFG_06, M2M_CFG_11 | | |
| References: | ETSI TS 102 921 [1], clause 10.19.2 ETSI TS 102 690 [2], clause 9.3.2.15 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> • NA is registered on NSCL • DA/GA has created an Application resource <app> on GSCL • DA/GA has created a container resource <container> in <app> on GSCL | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | NA is requested to send a contentInstanceCreateRequest (POST) |
| | 2 | Check (mla) | Sent POST request contains: <ul style="list-style-type: none"> • Request URI <gscl>/applications/<app>/containers/<container>/contentInstances • Host :NSCL • Payload: ContentInstance resource <contentInstance> to be created |
| | 3 | Check (mld) | Sent POST request contains: <ul style="list-style-type: none"> • Request URI <gscl>/applications/<app>/containers/<container>/contentInstances • Host :GSCL • Payload: ContentInstance resource <contentInstance> to be created |
| | 4 | Check (mld) | GSCL sends response containing: <ul style="list-style-type: none"> • Code = 201 • Content-Location: <gscl>/applications/<app>/containers/<container>/contentInstances/<contentInstance> • Payload: <contentInstance> resource |
| | 5 | Verify | NSCL indicates successful operation |
| | 6 | Check (mla) | NSCL sends response containing: <ul style="list-style-type: none"> • Code = 201 • Content-Location: <gscl>/applications/<app>/containers/<container>/contentInstances/<contentInstance> • Payload: <contentInstance> resource |
| | 7 | Verify | NA indicates successful operation |

| Interoperability Test Description | | | |
|-----------------------------------|--|-------------|---|
| Identifier: | TD_M2M_E2E_03 | | |
| Objective: | NA retrieves a contentInstance resource < contentInstance> to the contentInstances resource of a specific container in remote GSCL via a contentInstanceRetrieveRequest | | |
| Configuration: | M2M_CFG_06, M2M_CFG_11 | | |
| References: | ETSI TS 102 921 [1], clause 10.19.3 ETSI TS 102 690 [2], clause 9.3.2.15 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> • NA is registered on NSCL • DA/GA has created an Application resource <app> on GSCL • DA/GA has created a container resource <container> in <app> on GSCL • DA/GA has created a contentInstance resource <contentInstance> residing under the <container> resource | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | NA is requested to send a contentInstanceRetrieveRequest (GET) for retrieving the attributes/meta-data and the opaque data of a <contentInstance> resource |
| | 2 | Check (mla) | Sent GET request contains: <ul style="list-style-type: none"> • Request URI <gscl>/applications/<app>/containers/<container>/contentInstances • Host :NSCL • Payload: empty |
| | 3 | Check (mld) | Sent POST request contains: <ul style="list-style-type: none"> • Request URI <gscl>/applications/<app>/containers/<container>/contentInstances • Host :GSCL • Payload: empty |
| | 4 | Check (mld) | GSCL sends response containing: <ul style="list-style-type: none"> • Code = 200 • Payload: <contentInstance> resource |
| | 5 | Verify | NSCL indicates successful operation |
| | 6 | Check (mla) | NSCL sends response containing: <ul style="list-style-type: none"> • Code = 200 • Payload: <contentInstance> resource |
| | 7 | Verify | NA indicates successful operation |

| Interoperability Test Description | | | |
|-----------------------------------|--|-------------|---|
| Identifier: | TD_M2M_E2E_04 | | |
| Objective: | NA deletes a contentInstance resource < contentInstance> to the contentInstances resource of a specific container in remote GSCL via a contentInstanceUpdateRequest | | |
| Configuration: | M2M_CFG_06, M2M_CFG_11 | | |
| References: | ETSI TS 102 921 [1], clause 10.19.4 ETSI TS 102 690 [2], clause 9.3.2.15 | | |
| Pre-test conditions: | <ul style="list-style-type: none"> • NA is registered on NSCL • DA/GA has created an Application resource <app> on GSCL • DA/GA has created a container resource <container> in <app> on GSCL • DA/GA has created a contentInstance resource <contentInstance> residing under the <container> resource | | |
| Test Sequence: | Step | Type | Description |
| | 1 | Stimulus | NA is requested to send a contentInstanceDeleteRequest (DELETE) |
| | 2 | Check (mla) | Sent DELETE request contains: <ul style="list-style-type: none"> • Request URI <gscl>/applications/<app>/containers/<container>/contentInstances/<contentInstance> • Host :NSCL • Payload: empty |
| | 3 | Check (mld) | Sent POST request contains: <ul style="list-style-type: none"> • Request URI <gscl>/applications/<app>/containers/<container>/contentInstances • Host :GSCL • Payload: empty |
| | 4 | Check (mld) | GSCL sends response containing: <ul style="list-style-type: none"> • Code = 204 • Payload: empty |
| | 5 | Verify | NSCL indicates successful operation |
| | 6 | Check (mla) | NSCL sends response containing: <ul style="list-style-type: none"> • Code = 204 • Payload: empty |
| | 7 | Verify | NA indicates successful operation |
